EARLY CENTS AUCTIONS

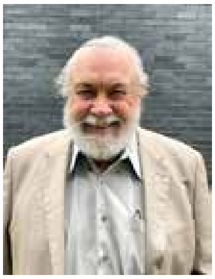
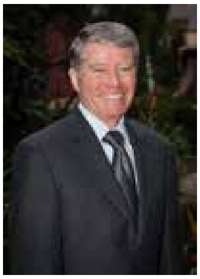
Dear Bidder,

The Heritage Auctions team is again proud to partner with Chris Victor-McCawley's Early Cents Auctions to present the COL Steven K. Ellsworth Collection of U.S. Large Cents 1796 to 1814. The 232 lots in this auction include every Sheldon number of the Draped Bust and Classic Head types along with 23 of the 32 Sheldon "NC" varieties. A census of the top examples of each Draped Bust NC variety is included in the back of this catalog. A well-known figure at conventions around the country, COL Ellsworth remains active in the hobby. His biography in the present catalog will inform readers of his military career and his personal interests outside of numismatics.



Chris Victor-McCawley



Bob Grellman

Lyle Engleson

Lucas Baldridge

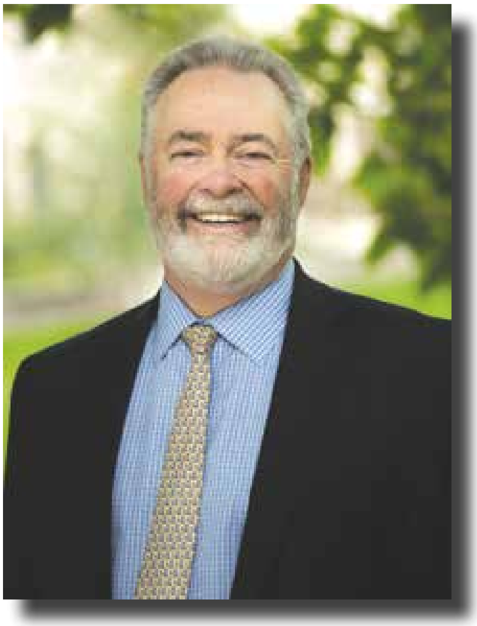
Travis Hollon

Early Cents Auctions owner Chris Victor-McCawley and Heritage President Greg Rohan provided oversight and overall direction for this project. Bob Grellman of Early Cents Auctions provided the technical numismatic descriptions while Heritage Senior Numismatist Mark Borckardt provided the "color commentary." Lyle Engleson of Early Cents Auctions worked with the Heritage marketing team to present this catalog. In addition, Sam Foose of Heritage Auctions, Lucas Baldridge of Early Cents Auctions, and Travis Hollan of Early Cents Auctions were involved in this presentation.

COL Ellsworth acquired the cents on the following pages over the last four decades, beginning with lot 2036, a 1797 S-121b cent that he purchased in June 1982. The most recent purchases are six lots that were acquired last January. Along the way, several famous cents were acquired, including the famed 1799 Abbey cent. The provenance of coins offered in the following pages include a veritable Who's Who of early copper collectors. Just a few of the names to follow include Brown, Downing, French, Garrett, Hines, Holmes, Husak, Loring, Naftzger, Newcomb, Norweb, Parmelee, Rasmussen, Sheldon, and Smith.

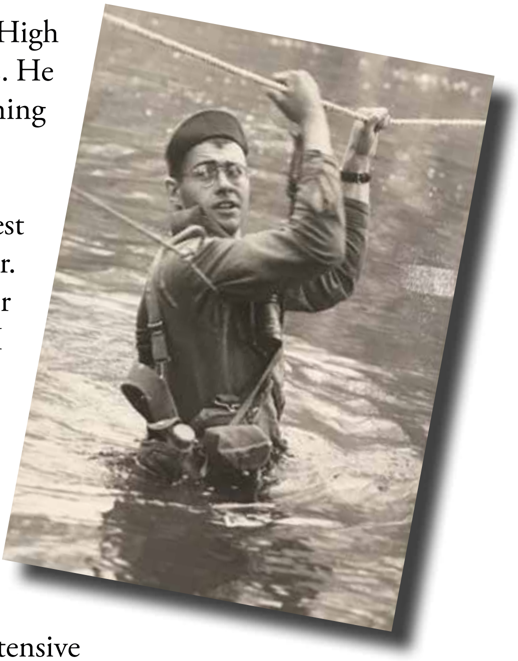
Heritage Auctions and Early Cents Auctions are pleased to present the COL Ellsworth Collection to the large cent community, and we look forward to January 2026 for the remaining early large cents when we join together to offer the COL Steven K. Ellsworth Collection of U.S. Large Cents 1793 to 1795.

THE COL STEVEN ELLSWORTH COLLECTION OF U.S. LARGE CENTS 1796-1814

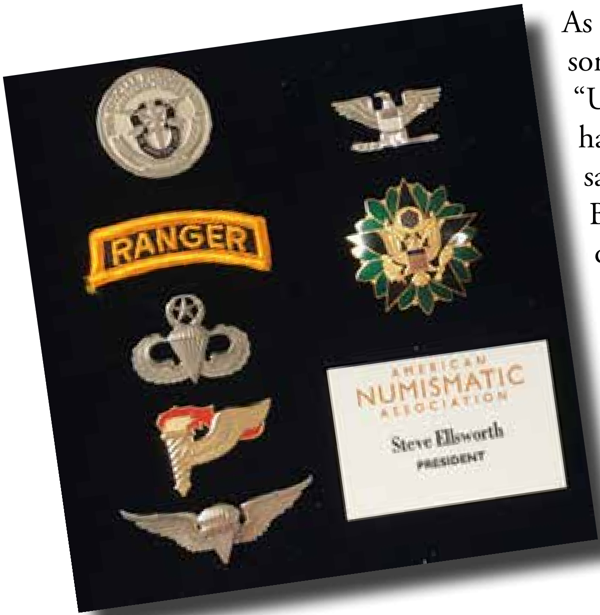


COL Steven Ellsworth, ret. pursuit of numismatic excellence began much earlier. It has been a long journey from the July 23, 1958 newspaper issue of the *Salt Lake City Tribune* recounting a story of a young man who brought a 40-pound piggy, or in this case, a hog bank into the Valley State Bank in Salt Lake City. Among the piles of half dollars, quarters, dimes, and nickels, was an 1873 Indian head cent. Could this be the coin that launched a thousand trips to banks, coin shops, and conventions throughout his life?

He was a competitive skier who opened a sporting goods store, Mountaineer Sports, while still in high school. He expanded the business to three stores while still in his teens, and soon expanded further to seven retail stores. It would seem inevitable that his entrepreneurial spirit would lead him to professional numismatics. He has been the principal of the Butternut Company since 1994.



In 1964 Steve graduated from East High School in Salt Lake City. The first of a dozen civilian and military degrees. He completed an undefeated 139-pound senior wrestling season by becoming state champion, undefeated and unscored upon.



As I was writing this, my youngest son glanced over my shoulder. "Undefeated. That means never having lost, right?" "Well, yes", I said, "it sure means lots of winning. But is also means having never quit. Steve is still competing and is not done yet."

The list of all Steve Ellsworth's endeavors and accomplishments is too extensive to list here. One of note caught my eye. In 1965 Steve served as a "parachute rigger." I have a brother-in-law who was a paratrooper, so I have a bit of information from him. Let me explain how that one line in Steve's resume is earned. First, you are selected for training as a paratrooper and pass jump training school. The best graduate of jump training might be invited to be a "rigger." (First, I should point out that the pretty pastel colored air foils you see floating over the field at the Super Bowl are not the parachutes the army used in 1965.) The army's candidate then spent several months on the ground and in the classroom learning to properly rig a parachute. The class is basically pass/fail. They strap the chute you packed to your back and have you jump out of a plane at 1,500 feet. If the chute opens and you reach the ground safely after five times, you pass the class.

Steve was then sent to Ranger School to begin his training in November. Ranger School is the Army's most demanding training and is also offered to the elite fighters of the Navy, Air Force and Marines. The "winter" Ranger training is considered the most brutal. "After being a Winter Ranger everything else in life is easy" Steve likes to say. Then he was sent to Infantry Officer Candidates Course and upon graduation was commissioned a 2nd Lieutenant.

Steve's next assignment was commanding officer of operation detachment 19th Special Forces Group. As a Green Beret and Army Ranger, Steve rose quickly through the ranks from private to achieving the rank of Colonel. In 1994 he was assigned a joint service Chief Military Liaison to the newly formed Republic of Slovenia (which had won its independence from Yugoslavia in 1992) and its 400-mile border with Croatia. Slovenia and Croatia are beautiful, stable, and popular tourist destinations today; more so than they were in 1992-1995.

As a full Colonel, Steve served two tours at the Pentagon as a Deputy in Legislative Affairs for the Secretary of the Army and as a special assistant to the Chief of Staff of the Army. In addition to two Under-graduate degrees and two Graduate degrees, he is a graduate of the Army Command and Staff College, The Army War College, The National Defense University and the prestigious National War College.

Most of you reading this know Steve from his active role in Numismatics both as a collector and dealer and as one of the foremost security experts and longtime contributor to the Redbook. Most recently many know him as a past president of the American Numismatic Association, 2019- 2021, where he has been an instructor for over 15 years. Recently, he also was the catalyst and driving force that changed the elimination of the sales tax on coins, currency and bullion for the state of Tennessee. This set the stage for him being the Managing Partner of the International Money Exposition held every two years in Nashville.

INTERNATIONAL
MONEY EXPO

Steve is not only a "great American" but is one of the all-time great American numismatic personalities. An important and accomplished collector. COL Steve and Walt Husak had several competitions to exhibit their respective collections in a virtual "copper showdown" or "Whist Match." I didn't see the 1873 Indian head cent, but did see many of the finest known Early Date Large Cents known.

We are honored and proud to present the first half of his Early Date Collection of the complete Sheldon varieties of the Draped Bust and Classic Head Large Cent Collection of COL Steven K. Ellsworth in a live auction held at the FUN Convention Thursday January 9, 2025 at the Orange County Convention Center, in Orlando, Florida. This collection is destined to be one of the great auctions of all time of early American copper coins and a chance of a lifetime to be a part of this historic event to so many numismatists.

2001 1796 **S-92 R3, Draped Bust, Reverse of 1795, VF30 PCGS**. Glossy chocolate brown and steel. No roughness or verdigris but there are some contact marks including a dull scratch at TE in STATES. The marks are old and blend nicely into the attractive toning. MDS, Breen state III, with die cracks at ERTY and die clashmarks, strongest on the obverse. There is a clearly defined double profile from the brow lock down to the chin with additional doubling on the neck (from die shift or "machine doubling"). Breen mentions in his 2000 encyclopedia on the cents of 1793-1814 that this variety "sometimes shows double profile," and this one certainly does. This cataloger's EAC grade is net F15+. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35813.30/16999821. PCGS population attributed as S-92: 1 in VF30; 7 finer (10/24).

Ex Dennis C. Lyons 1/10/1998-COL Steven K. Ellsworth.

Double profiles are a form of mechanical or machine doubling. Loose dies or die holders in screw presses allow the dies to shift or chatter during striking. The key characteristic is a narrow shelf-like outline on one side of the affected devices. Sometimes, the dies will shift more than once, creating triple or multiple profiles. The shift doubling is typically seen on Liberty's profile, although there are instances where the doubling is seen on the wreath or lettering. Double or multiple profiles are popular with many collectors although they do not constitute a die state or sub-variety

2002 1796 S-93 R3, Draped Bust, Reverse of 1795, AU58 PCGS, CAC Approved. Frosty medium brown and light chocolate with traces of very faded mint color in protected areas on the obverse. A sharp cent with just a hint of friction on the highest points of the devices. The eye appeal of this cent is excellent. No notable spots, stains, or contact marks. The only notable defects are some tiny pre-striking planchet chips that didn't completely smooth out during the strike, a problem common on these early planchets. These chips are concentrated over ERTY because the striking pressure in that area was weakened by the opposing die failure at RICA and the denominator. The best identifying mark is a small chip in the center of the upright of the L in LIBERTY (as struck). MDS, Breen die state V. There is obvious die failure near the rim from RICA to the denominator but no cud breaks are present, and the die clashmarks on the obverse are strong. A small patch of significant die rust shows in the field off the lower end of the hair ribbon, and a die crack meanders through the date. Graded AU50 net EF45 and tied for CC#7 in the Noyes census, his photo #31069. Bland says AU55 and tied for CC#6 in the Breen/Bland census. This cataloger's EAC grade is AU50+, close to AU55. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35816.58/32788317. PCGS population attributed as S-93: 2 in AU58; 3 finer (10/24).

Early American Coppers member number 190 was Dr. Carol Rudolph Chambers of Union City, Indiana. Known for his dedication to early American large cents, Dr. Chambers amassed a notable collection that included several Condition Census coins. Born on April 18, 1931, in Union City, he passed away on July 15, 2007, in Winchester, Indiana. Dr. Chambers was the son of Dr. Leroy B. Chambers and Eleanor Aletha (Greene) Chambers. He pursued his education at Indiana University and devoted many years to managing the Chambers Medical Clinic in Union City.

1796 S-94 DRAPED BUST CENT, XF45 REVERSE OF 1797

2003 **1796 S-94 R6-, Draped Bust, Reverse of 1797, XF45 PCGS.** Choice glossy chocolate and olive brown with lighter brown toning in protected areas of the reverse. The best identifying mark is a small splash of darker olive brown toning (not carbon) on the N in CENT. Only a few trivial contact marks from flawless for the grade, none notable or visible without a glass. The always present die clashmarks are clearly visible on both sides of the portrait and the patch of die rust under the hair ribbon is bold. Called EF40 and finest known in the Bland census. Noyes says EF40 net VF35 and CC#2, his photo #32215. This cataloger's EAC grade is EF40. This cent is far superior to the Breen plate coin for the variety. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35843.45/43987706. PCGS population attributed as S-94: 1 in XF45; 1 finer (10/24).

Dr. Robert J. Shalowitz, an obstetrician-gynecologist based in Glen Dale, West Virginia, was not only dedicated to his medical practice but also passionate about golf, aiming to play each of the top 100 courses in the U.S. He became a member of Early American Coppers in 1972, holding member number 260. Shalowitz earned his medical degree from the University of Maryland, completed his residency at York Hospital in Pennsylvania, and practiced for many years in Akron, Ohio. Originally from Baltimore, Maryland, he was born on March 28, 1951, and developed an interest in numismatics at a young age, starting with Lincoln cents and specializing in large cents since he was 16. In 1974, he acquired Denis Loring's renowned Sheldon-number set. Known affectionately as Bob or Shal to his friends, he passed away on April 16, 2022.

REVERSE OF 1795

2005 1796 S-96 R6, Draped Bust, Reverse of 1795, XF Details, Altered Surfaces, PCGS. Slightly glossy dark olive brown and steel. Nicely detailed with no marks or verdigris, but both sides are covered with uniform microscopic roughness under the slightly glossy toning. Appears to have been very lightly burnished (or perhaps aggressively brushed). EDS, Breen state I, with an uncracked reverse. A superior example of this very rare variety in spite of the imperfect surfaces. Graded VF25 sharpness net F12 and tied for CC#1 honors in the Bland census, but since that list was published a superior, nearly mint state example of the variety turned up in Europe. Noyes says VF25 net F12 and tied for CC#2, his photo #20516. This cataloger's EAC grade is net F12. William Frederick Sunday, born on October 1, 1889, in Scranton, Pennsylvania, and passing away on April 11, 1967, in Florida, was an active figure in numismatics. A veteran of World War I, Sunday resided in Rochester, New York, where he was employed in the clothing business at the Hickey-Freeman Company. He was a past president of the Rochester Numismatic Association and contributed to the American Numismatic Association, serving multiple terms on its governing council. Notably, he conducted the auction for the association's 1931 convention held in Cincinnati. In numismatic circles, Sunday's name appears in *Walter Breen's Encyclopedia of United States Half Cents*, albeit in a critical footnote. Breen described him as engaging in activities such as tooling, polishing, re-engraving, and removing corrosion from large cents.

The surfaces are smooth and nearly flawless. The best identifying marks are a small swipe of slightly darker chocolate toning in the field under the lower end of the hair ribbon and a smaller spot of similar toning at the left foot of the N in ONE. MDS, Breen state III. A narrow rim cud covers many of the dentils before the face and there is a very light die crack through the top of TY in LIBERTY. This is the plate coin for the variety in Dr. Sheldon's *Early American Cents* and *Penny Whimsy*. Graded EF45 and CC#2 in the Noyes census behind only the unattainable ANS example, his photo #39042. Bland says VF30 and tied for CC#5 in the Breen/Bland census. This cataloger's EAC grade is VF35 Choice. Comes with an important provenance. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35825.45/32777408. PCGS population attributed as S-97: 1 in XF45; 0 finer (10/24).

Dr. George P. French, born in Rochester, New York, in 1865, distinguished himself as an obstetrician and gynecologist. He completed his medical education at Columbia Medical College in 1888. Known for his sociable nature and talent for poetry, French cultivated a passion for numismatics, particularly amassing an extensive collection of large cents. His coins were prominently displayed at numerous American Numismatic Association (ANA) conventions, and at the 1914 American Numismatic Society (ANS) exhibition. Beyond numismatics, French also indulged in collecting stamps, clocks, firearms, and various antiques. His large cent collection saw dispersal through several renowned auctions: parts were sold by the United States Coin Company in 1917, Henry Chapman in 1927, and B. Max Mehl offered the majority in a 1929 fixed price list. Barney Bluestone later handled an additional selection from the French Collection in 1933. Dr. French, a prominent figure in both medical and numismatic communities, passed away at his Rochester residence on November 25, 1932.

REVERSE OF 1795

2007 **1796 S-98 R4, Draped Bust, Reverse of 1795, XF Details, Environmental Damage, PCGS**. Dark reddish brown and steel. The devices are sharp showing very little if any wear, but the planchet is covered with uniform moderate granularity. No verdigris and the only mark is a small nick under the lower end of the hair ribbon. Sharply struck EDS, Breen state I, before the break from the rim to the right top of the Y in LIBERTY. The eye appeal of this cent is better than you might expect for a granular coin. Graded AU50 net F15 and tied for CC#11 in the Noyes census, his photo #28850. This cataloger's EAC grade is net F15 as well. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35828.97/44293937.

Dorothy I. Paschal, an EAC charter member, was born on September 22, 1905, in New York City. A talented biological researcher, she worked at Columbia College of Physicians and Surgeons starting in 1950. Known for her charm and exquisite taste, she was affectionately called "Doctor Dorothy." Her passion for large cents began after meeting Dr. Sheldon, and she went on to assemble a remarkable collection, becoming the third person to complete the Sheldon-numbered varieties. Paschal earned a B.A. from Columbia University and married Guy Paschal on October 12, 1926, with whom she had two sons and a daughter. She collaborated with Sheldon on his work, *Penny Whimsy*, and her collection was later sold by large cent dealer Ray Chatham. Dorothy Paschal passed away on June 3, 1981, and her obituary was published in the September 1981 issue of *Penny-Wise*.

NOYES PLATE COIN

2008 **1796 S-99 R5, Draped Bust, Reverse of 1795, AU Details, Altered Surfaces, PCGS.** Sharpness AU50 or slightly better but covered with uniform extremely fine granularity in the fields and protected areas. The roughness is mostly hidden under rather glossy dark steel and olive brown toning. No verdigris or notable contact marks. The surfaces are satiny and the eye appeal of this cent is excellent although it may have been lightly cleaned and retoned long ago. The best identifying defect is some strike weakness at the top of ERT in LIBERTY. EDS, Breen state I, with an uncracked obverse. Called EF45 net VF35 and finest known in the Bland census. Graded EF45 net VF30 and tied for CC#1 in the Noyes census, his photo #21708. Bland says EF45 net VF35 and finest known. This cataloger's EAC grade is net EF40. Rufus Lawson Miles, Jr., a notable figure from Norfolk, Virginia, served for 20 years on the governing body of the American Contract Bridge League. Born on July 26, 1907 (sources vary between 1906 and 1908), he passed away in Virginia Beach, Virginia, on July 9, 1984. Miles was a distinguished alumnus of the University of Pennsylvania, graduating in 1930 while actively participating in football, track, crew, and golf. After earning a master's degree from Columbia University, Miles joined J.H. Miles Company, a prominent firm specializing in oyster cultivation and packing. Additionally, he played a pivotal role in the Berlin-Miles construction company, a major entity operating across Virginia and North Carolina. Part II of the R.L. Miles, Jr. Collection, featuring silver and copper pieces, was auctioned by Stack's from April 10-12, 1969. This auction featured 223 lots of early copper, showcasing varieties such as S-188 and S-189.

2009 1796 S-100 R5, Draped Bust, Reverse of 1797, VF30 PCGS. Slightly glossy olive brown and dark steel with lighter steel brown toning on the highpoints. Nicely detailed with decent eye appeal, but the planchet is covered with very fine roughness and there are specks of reddish scale in protected areas on the reverse. Nearly void of marks; a small tick on the rim over the T in LIBERTY and a rim nick at the R in AMERICA can help identify this cent. MDS, Breen state II, with die clashmarks at the throat and neck, but the crack at TES OF has not formed. Graded VF30 net F15 and CC#6 in the Noyes census, his photo #25098. Masters, born on February 19, 1914, in Gary, Lake County, Indiana, was the son of Frank Harris Masters, a civil engineer involved in the construction of the Panama Canal, and Clara Louise Roelkers. He passed away on May 23, 1985, in Chicago, with burial in Joliet, Illinois. Frank H. Masters, Jr. served prominently as Illinois state attorney of Will County for several years and later as a special assistant Illinois attorney general. Despite living during the Early American Coppers (EAC) era, there is no record indicating that Masters ever joined the organization.

Thomas James Clarke, an early life member of the American Numismatic Association, held the organization's presidency from 1935 to 1937. Born on May 5, 1875, in Ontario, Canada, he passed away at his home in Jamestown, New York, on July 20, 1952. Known as T. James Clarke, he was a multifaceted individual who founded the T. James Clarke Box and Label Works in 1916 and served as a director of the National Chautauqua County Bank. Clarke's diverse collecting interests spanned autographs, glassware, Indian relics, stamps, weapons, and coins. In the realm of numismatics, he exhibited a particular enthusiasm for early copper coins, silver coins, and paper money. Notably, he showcased over 1,000 Lincoln medals in 1944. In 1912, Clarke married Hazel Claribel Johnson; however, the couple did not have children. His legacy in numismatics and beyond reflects a deep-seated passion for collecting and contributing to the community through his various roles and interests.

2011 **1796 S-102 R4, Draped Bust, Reverse of 1794, AU50 PCGS.** Frosty light steel brown and tan with peeps of mint luster in some of the protected areas. No corrosion or verdigris but there are small marks scattered over both sides. Some of the marks are tiny planchet flakes, as struck, but these are mixed with contact marks. The notable contact marks are a dull scrape on the upper edge of the bust, a dull rim nick off the lower end of the hair ribbon, and another at the A in STATES. The mark on the bust is the only one that catches your eye. EDS, Breen state I, before the obverse die cracked. There is fine but clear doubling on the end of the nose, along the lower edge of the jaw, and on the lower edge of the hair ribbon (from die shift or "machine doubling"). Graded EF40 net VF25 and tied for CC#5 in the Noyes census, his photo #27565. Bland says EF45 net VF30 and tied for CC#5. This cataloger's EAC grade is net VF30. Willard Charles Blaisdell, born on October 30, 1903, in Massachusetts and passing away on July 12, 1985, in Elizabeth, New Jersey, was an esteemed member of numismatic organizations in New Jersey and New York. He began his pursuit of large cent collecting in 1933, sharing his interest with contemporaries such as Henry Hines and George Clapp. Notably, in 1965, Blaisdell made a significant discovery with the finding of the 1794 NC-8 large cent. Alongside his numismatic pursuits, he was the proprietor of States Electronics in Elizabeth, New Jersey. At gatherings of the Early American Coppers (EAC), Blaisdell was instantly recognizable by his distinctive appearance: his white hair, always parted in the middle, his trademark bow tie, and his twinkling blue eyes.

Leonard William Stark, born on August 9, 1921, in Chicago, Illinois, and passing away there on November 15, 1997, was a notable figure with a diverse array of interests and contributions. A veteran of the U.S. Navy, Stark was the proprietor of Chicago's Central Coin Mart. His involvement in numismatics was extensive, highlighted by his service on the Assay Commission in 1963 and his lectures alongside esteemed colleagues at Roosevelt University's "Numismatics, the Story of Civilization" in 1965-1966. Notably, Stark also served as the numismatics editor for the *Chicago Tribune*. Beyond numismatics, Stark had a deep passion for baseball, which began during his youth when he served as a visiting-team bat boy for the Chicago White Sox in the 1930s. His love for the sport extended into adulthood, where he contributed as a baseball scout for the St. Louis Browns at one point in his career.

Richard Picker, a prominent dealer specializing in colonial coins, was born on June 22, 1915, in New York City and passed away there on February 1, 1983. A World War II veteran, he was deeply involved in the numismatic community and made significant contributions to colonial coinage research, particularly in Massachusetts silver coinage. Picker authored several articles for *The Colonial Newsletter* and was a valuable resource for fellow numismatists. His personal collection, featuring an impressive array of brockage errors, was sold by Stack's and Coin Galleries in 1984, 1989, and 1990.

REVERSE OF 1794

2016 **1796 S-107 R5 Draped Bust, Reverse of 1794, G6 PCGS.** Mostly glossy dark olive brown and chocolate. The obverse was lightly smoothed to remove minor roughness but some fine porosity still shows, mostly in the fields. The strike is uneven, as often seen on the variety, with significant weakness at the top of the reverse while the remainder of the reverse displays the details of a VG10 example. No verdigris and the notable contact marks are a very light rim bruise at LI in LIBERTY, another at that T, and one right of the Y. The bottom of the 17 is fading into the rim due to the uneven strike but the remainder of the date is clear. EDS, Breen state I, before any die cracks or cuds. This cataloger's EAC grade is VG7. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35792.06/15004886. PCGS population attributed as S-107: 2 in G6; 3 finer (10/24).

2017 **1796 S-108 R4, Draped Bust, Reverse of 1794, AU Details, Exc. Corrosion, PCGS.** A very sharp cent that shows little if any wear, but fine to moderate roughness covers most of the obverse while microscopic roughness covers the reverse. The roughness on the obverse is mixed with the tiny bumps found on the late die state that come from a rusted die, so some of the roughness is "mint made." Dark olive brown and steel mixed with greenish olive and maroon tints in the roughened areas on the obverse. The only notable contact mark is a small dig in the hair left of the forehead. LDS, Breen state V, with a fine die crack through 796 and the bust into the field above. Graded AU50 net VF20 and tied for CC#6 in the Noyes census, his photo #21328. Jack Howard Beymer, a native of Minnesota, was born in Fairmount on April 30, 1933. His educational journey took him through Modesto Junior College, Sacramento State College, and the University of California, Berkeley. On September 10, 1967, he married Sondra Ross in San Francisco, and together they raised two children. Before establishing himself as a coin dealer in 1967, Beymer pursued various professions: he worked as a dairyman, an accountant at Gallo Wineries, a food inspector with the Department of Agriculture, and a buyer for Consolidated Foods. His rare coin business began in Santa Rosa, California. Upon reaching his 90th birthday, Beymer sold his business to Seth Chandler, the owner of Witter Coin.

Thomas Lindsay Elder, an early member of the American Numismatic Association (ANA #140), was born in Dayton, Pennsylvania, on November 22, 1874, and passed away in South Carolina on May 11, 1949. He began his education at Beaver College in Pennsylvania before relocating to Buffalo, New York. In his twenties, Elder served as a telegrapher for the government and was notably assigned to the home of President William McKinley during his final hours after being shot in 1901. He later served as a sergeant in the New York State Militia during World War I. Elder's fascination with coins began at the age of 13, marking the inception of his distinguished numismatic career as a dealer and auctioneer starting in 1905. Over the span of 35 years, Elder conducted nearly 300 auctions and made significant contributions to numismatic literature. He wrote for *The Numismatist* and published periodicals such as *The Elder Monthly, The Numismatic Philistine*, and *The Elder Magazine*. His scholarly pursuits included updating the Hays-Frossard variety reference on 1794 large cents and collaborating with Ebenezer Gilbert on a similar reference for 1796 large cents. Additionally, Elder designed and issued numerous small medals and store cards.

Abe Kosoff handled the large cent collection of Edward Harold Schwartz in October 1961. Schwartz was a Philadelphia, Pennsylvania collector and an active member of the Philadelphia Coin Club. A special tour of the Philadelphia Mint was arranged for those who attended the 1957 ANA convention. Schwartz was a member of the "Mint Trip Committee." He was born in Philadelphia on January 1, 1916, and died on April 28, 1995. He was a 50+ year member of the ANA who joined in August 1943. His obituary in *The Philadelphia Inquirer* of April 30, 1995, states that Schwartz was "a Philadelphia businessman, stockbroker, and arts patron" who was a member of the New York Stock Exchange. His obituary continues: "He served on the Fairmount Park 'Save Our Sculpture' Committee and donated a bronze statue of a larger-than-life bullmastiff, which now sits near the Art Museum in Reliance Triangle."

A U.S. Navy admiral, Worthington Smith Bitler formed an important collection of early date large cents. Abe Kosoff purchased his collection in 1960 and slowly sold the coins through auction and private transactions. Kosoff consigned the rest of the coins along with those from other sources to an A-Mark auction held on March 17, 1973. Known as "Worthy," Bitler was born in Norfolk, Virginia on April 29, 1900 and died in Burlington, New Jersey on April 4, 1987. He married Mildred and they had a daughter, Nina Bitler, who was born about 1915. Bitler remarried Doris Blaisdell. He served as Commander of the *USS Salt Lake City* during World War II, earning the Silver Star.

David Proskey was born in Wappingers Falls, New York, on December 12, 1853, and died in North Caldwell, New Jersey, on August 16, 1928. After conducting a brief run of auctions, he joined Harlan Page Smith in the New York Coin and Stamp Company, handling many important collections including the Parmelee Collection in 1890. He also compiled a series of articles about large cents that were published in the *Coin Collector's Journal*. Lapp and Silberman note: "He was tall, straight, and wore a heavy beard. He was possibly the best-informed man on the east coast in coins and in antiques in general; he was also an authority on postage stamps." John W. Adams described his abilities: "His numismatic knowledge was so broad, ranging from prehistoric to modern times and from South America to the Baltic Sea, that he was a frequent consultant to other dealers."

2027 **1796 S-118 R5+, Draped Bust, Reverse of 1797, VG Details, Environmental Damage, PCGS**. Partly glossy chocolate brown with lighter chocolate on the portrait. Fine roughness covers most of the planchet and there are some pits at RT in LIBERTY. Traces of verdigris show on both sides, mostly on the reverse. On the plus side the date is bold and the legends are clear. EDS, Breen state I, before the narrow rim break left of the fraction. Graded VG7 net G5 and tied for CC#19 in the Noyes census, his photo #26432. This cataloger's EAC grade is net G6. A variety that is quite difficult to find in higher grades; only a half dozen are known that grade above VG by EAC grading standards. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. (The obverse of the holder is scuffed.) #35867.97/44279261.

REVERSE OF 1797

2028 **1796 S-119 R3, Draped Bust, Reverse of 1797, MS62 Brown, PCGS.** Frosty medium brown and light chocolate with underlying mint luster in the fields and protected areas. Looks mint state but there is a hint of rub on the highest points of the devices. The right side of the obverse and upper right section of the reverse show many small planchet imperfections that did not completely smooth out during the strike. This condition is normal for the variety because the dies were not in proper axial alignment (the die faces were not perfectly parallel). The largest of these planchet flaws shows near the dentils above the end of the bust. LDS, Breen state III, with die cracks on the obverse and small rim cud breaks over TAT in STATES. Graded AU55 by Del Bland. This cataloger's EAC grade is AU55+. This cent probably came from the famous Nichols Hoard of mint state 1796 and 1797 cents. FINEST 1796 NC-1 RARITY

2029 **1796 NC-1 R6, Draped Bust, Reverse of 1797, XF45 PCGS, CAC Approved.** Glossy chocolate brown with darker steel brown toning on the highpoints; possibly lightly cleaned and retoned. The surfaces are smooth and show only a few trivial contact marks. The notable marks are a light rim bruise over the L in LIBERTY, a tiny pinprick on the bust, another low on the neck, and a few tiny rim nicks at the top of the reverse. Nicely struck EDS, Breen state I. The obverse die is uncracked and there is a strong double profile from the forehead down to the tip of the nose. Less-obvious doubling shows on the legends at the top of the reverse, all the doubling a result of die shift or "machine doubling." This is the plate coin for the variety in the 1991 Noyes reference on the early large cents, and the reverse is plated in Dr. Sheldon's *Early American Cents* and *Penny Whimsy*. Graded VF30 net VF20 and finest known in the Noyes census (although he graded it VF30 in his 1991 reference), photo #21411. His current census for the finer examples of the variety is 20-15-12-8(3)-7(8)-6, and all are net graded for defects. Bland says VF25 and finest known by a full 10 points in his census. The top 12 grades in the Bland census are 25-15-10-8(9). This cataloger's EAC grade is VF25+, close to VF30. This is the undisputed finest example of this very rare variety, and it comes with a wonderful provenance that has been traced back over a century. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35873.45/32782908. PCGS population attributed as 1796 NC-1: 1 in XF45; 0 finer (10/24).

The author of "The State Coinage of Connecticut" that appeared in the *American Journal of Numismatics* in 1919, Henry Clay Miller was an educator, broker, and mining researcher. A native of Philadelphia, Miller was born on May 19, 1844, and died on February 6, 1920. Remaining single his entire life, Miller was able to pursue his passions. He graduated from Williams College and spent much of the late 19th century in the field of education. An obituary in the May 1920 issue of *The Numismatist* relates: "The death of Henry C. Miller on February 5, 1920, recalls the intense personality of a man who, a number of years ago, exerted a marvelous influence on a growing generation in matters educational." Material from the Miller collection appeared in four auctions, including his cents and half cents that Thomas L. Elder sold in April 1917, and his Connecticut copper collection that Elder sold in May 1920.

2030 1796 NC-3 R6, Draped Bust, Reverse of 1797, VF35 PCGS. Attractive glossy chocolate brown with steel brown toning on the highpoints and lighter brown toning in protected areas of the reverse. No spots, stains, or roughness. Nearly void of contact marks. The best identifying marks are a pair of tiny planchet flakes near the rim off the upper end of the hair ribbon and a small, shallow planchet flake at the dentils over the first A in AMERICA, all as struck. MDS, Breen state III, with a rim break over IC in AMERICA. Graded VF30 net VF25 and CC#1 in the Noyes census, his photo #20870. The best 10 in his census are 25-12-8(3)-7-6-5(3), and all are net graded for defects. 2031 **1796 NC-4 R6, Draped Bust, Reverse of 1795, VF30 PCGS.** Rather glossy dark chocolate brown and steel with lighter brown in protected areas. An area of tan toning at the L in LIBERTY and along the back of the head can help identify this cent. The surfaces are smooth with the exception of a minor planchet lamination at OF (as struck). Just minor contact marks including a small nick on the chin, a light rim bruise over the second T in STATES, and a pair of nicks at the top of the wreath. LDS, Breen state II (which he calls Extremely Rare), with a strong die crack through TES to the rim at both ends. The area above the crack is slightly sunken as a retained cud. We know of only 4 examples in this die state, and the next finest of those grades VG8. This cataloger's EAC grade is net VF25. This cent is a new discovery and has not been evaluated by Noyes or Bland. The Noyes census for the top examples is 15-10(2)-8(2)-7(3)-6(4), and all are net graded. The Bland census for his top 10 examples is 10(3)-8(5)-7(2). In addition we know of one recently discovered example graded net F15 that is not in either list. Another finest known rarity in this superior collection. An important prize for the serious collector of rare varieties or significant die states. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35840.30/47360560. PCGS population attributed as 1796 NC-4: 1 in VF30; 0 finer (10/24).

1796 NC-5 DRAPED BUST CENT, AG3 REVERSE OF 1794

2032 1796 NC-5 R7, Draped Bust, Reverse of 1794, AG3 PCGS. Glossy medium chocolate brown with smooth highpoints and fine roughness in protected areas. No verdigris, only minor contact marks. The notable marks are a dull pinch on the rim at the top of the L in LIBERTY, four very light parallel scratches at the top of the obverse, and a few more on the rim before the portrait. The bottom of the date is wearing into the rim but the rest is strong. The legends outside the wreath are easily readable but ONE CENT is faint at best thanks to minor swelling always present on that reverse. The die crack from the lower edge of the jaw is clear. Graded AG3 and tied for CC#6 in the Noyes census, his photo #27710. Bland says G4 and tied for CC#4. This cataloger's EAC grade is AG3+. Only two are known that grade above Good and the finer of those two is impounded in the ANS Collection, so waiting for a higher grade example of this very rare variety might end in frustration. The complete Noyes census is 15-12-5(2)-4-3(2)-2(3). The Bland census is 15-12-6-4(2)-3(2) but a few additional low grade pieces have been discovered since his list was published in 2000. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35810.03/15004476. PCGS population attributed as 1796 NC-5: 1 in AG3; 1 finer (10/24).

A California businessman and cattle rancher, Roy Edgar Naftzger, Jr., known as "Ted," was raised in a ranching family. He was born on August 23, 1925, and died on October 29, 2007. He attended Stanford University, earned a history degree in 1948, and a master's degree from the University of Southern California 38 years later. Naftzger formed one of the finest collections of large cents held in private hands and had an interest in other numismatic specialties. He bought several collections intact, retaining pieces that he desired and selling the remainder at auction, often under the name of the original collector. In April 1972 he bought the collection of Dr. Sheldon and sold duplicates through New Netherlands Coin Co. in November 1973. The bulk of the Naftzger early-date collection was sold to Eric Streiner in 1992. He was an avid fisherman who was inducted into the International Game Fishing Hall of Fame in 2002.

The planchet is smooth except for some mint-made planchet flaws. Fine parallel planchet striations slant through the date and bust into the field above the bust where they fade out, and there are a couple tiny pinprick-sized planchet voids in the dentils below the date, all as struck. Otherwise the surfaces are choice, virtually flawless. Frosty light steel brown with steel brown toning on the highpoints and mint luster in protected areas. LDS, Breen state VI, with advanced die crumbling along the profile, on the hair ribbon, and on the top of the I in LIBERTY, plus a fine die crack from the dentils along the left side of the U in UNITED. The incuse grip marks and raised beads around the edge are strong. Called AU50 net EF45 and tied for CC#7 in the Noyes census, his photo #21593. Bland says EF45 as well and tied for CC#7. February 3, 1986, was an important date for the rare coin business, marking the start of business for the Professional Coin Grading Service, known as PCGS. The firm provides third-party authentication and grading of rare coins that are encapsulated in tamper-evident holders for long-term storage. Initial funding for the new company came from David Hall, Van Simmons, Bruce Amspacher, John Dannreuther, Gordon Wrubel, Silvano DiGenova, and Steve Cyrkin. Founder David Hall initiated the PCGS Set Registry program, an electronic version of "Old Cent Whist" that scores competing collections. There are currently more than 178,000 registered sets. Since 1986, PCGS has certified more than 64,000 large cents.

REVERSE OF 1797

2037 **1797 S-122 R5+, Reverse of 1797, VF20 PCGS.** The toning is a partly glossy mix of chocolate, olive, and reddish steel brown. The obverse is smooth with trivial contact marks and no defects, quite nice for this tough variety. The reverse is mostly smooth but there are areas of fine roughness, mostly at the top of the wreath and at ED in UNITED. A spot of raised greenish verdigris inside the top of the wreath, another at the F in OF, and a sharp nick on the left loop of the wreath ribbon are the only other defects worthy of mention. EDS, Breen state I, without any die cracks on the reverse. Graded VF20 net VG10 and tied for CC#4 in the Noyes census, his photo #28769. Bland says net F12 and tied for CC#2. This cataloger's EAC grade is net F12. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35906.20/15004461. PCGS population attributed as S-122: 1 in VF20; 0 finer (10/24).

1797 S-123 CENT, MS64 BROWN REVERSE OF 1797

2038 1797 S-123 R4, Reverse of 1797, MS64 Brown PCGS. Frosty medium brown and light chocolate with mint luster in protected areas. No spots or stains. The only defects are some microscopic ticks well hidden in the hair and some of the usual tiny planchet flakes on the upper part of the face. Nicely struck MDS, Breen state III, with a small but clearly defined cud break in the dentils over TA in STATES. What may look like a nick on the cheek left of the nostril is a die defect that is present on all examples of the variety. Most likely from the famous Nichols Hoard of mint state cents dated 1796 & 1797. This cataloger's EAC grade is MS62. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35909.64/43987713. PCGS population attributed as S-123: 3 in MS64 Brown; 0 finer (10/24).

Ex David Weinstein-Mid American Rare Coins (privately) 11/5/2016-COL Steven K. Ellsworth.

Jeffrey Charles Garrett was born on May 21, 1958, in Glasgow, Kentucky. At the age of 10, he began his lifelong passion for coin collecting, a hobby that would eventually define his professional career. By 1974, at just 16 years old, Garrett had already become a full-time coin dealer, starting his journey with the Florida Coin Exchange. In 1980, Garrett relocated to Lexington, Kentucky, where he expanded his involvement in the numismatic community. In 1984, he founded Mid-American Rare Coin Galleries and Mid-American Rare Coin Auctions, entities that quickly gained prominence in the industry. Over the next six years, these organizations conducted 20 auctions and introduced "Numismatic Express" sales for certified coins starting in 1990. In a significant move in 1993, Mid-American Auctions merged with Heritage Numismatic Auctions, further solidifying Garrett's influence in numismatics. His professional affiliations also include membership in the Professional Numismatists Guild (PNG), where he served as President from 2005 to 2007 and received the prestigious Glenn Smedley Memorial Award in 2005. Garrett's contributions extend beyond business; he has been deeply involved in numismatic education and advocacy. He served as a board member of the American Numismatic Association (ANA), where he held the positions of Vice President from 2013 to 2015 and President from 2015 to 2017. His expertise has been recognized internationally, as evidenced by his inclusion in the Rittenhouse Society and his role as a Numismatic Ambassador starting in 2008. A prolific author, Garrett has co-authored significant works such as the "*Encyclopedia of U.S. Gold Coins 1795-1933*" with Ron Guth and "*100 Greatest U.S. Modern Coins*" with Scott Schechter. He has also served as an editor for the Red Book, a definitive guide in numismatics. Garrett's impact on the field has been consistently acknowledged by his peers and the media. He was named one of "The Most Influential People in Numismatics 1960-2020" by *Coin World* in 2021, and subsequently in 2022 and 2024. In 2023, Jeff and his wife Mary Lynn Garrett were recognized together on the *Coin World* list of the "100 Most Influential People in Numismatics," reflecting their shared dedication to advancing the hobby and industry. Jeffrey Charles Garrett's career exemplifies a lifelong commitment to numismatics, marked by innovation, leadership, and a passion for the art and history of coins.

2039 1797 **S-124 R5+, Reverse of 1797, XF Details, Environmental Damage, PCGS.** Sharply detailed with very little if any wear but the planchet is dark olive and steel, nearly black, and covered with uniform granularity. Slightly glossy in spite of the roughness with no contact marks, but there are specks of verdigris on the reverse. M-LDS with strong swelling through the bust that weakens the second 7. Graded VF35 net VG7 and tied for CC#10 in the Noyes census, his photo #27855. Bland says MS60 sharpness net F15 and tied for CC#2. This cataloger's EAC grade is net VG10+, close to F12. One of the sharpest examples known of this tough die variety, and it comes with a very nice provenance. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35912.97/44293941.

2040 1797 S-125 R5, Reverse of 1797, VF Details, Environmental Damage, PCGS. Rather glossy mix of chocolate and darker olive brown. Mostly smooth but there are microscopic pits scattered over both sides mixed with a few specks of verdigris. The only contact mark is a tiny scratch in the field left of the lower curls. The date and legends are bold. MDS, Breen state II, with a bulge at the 97 through the bust and strong die clashmarks at the throat. Graded VF30 net F15 and tied for CC#6 in the Noyes census, his photo #26382. Bland says VF35 net VF25 and tied for CC#1 honors. This cataloger's EAC grade is net VF20. Moritz Wormser was the founder of New Netherlands Coin Company, operated by his son Charles, but it was the collaboration of John J. Ford and Walter Breen that put this firm on the numismatic map. Breen was the researcher who would put everything he knew about a coin on a note card, while Ford created exceptional descriptions. The firm handled many important copper sales, including the collections of Hillyer Ryder, F.C.C. Boyd and Judge Thomas Gaskill, Homer Downing, and duplicates of R.E. Naftzger, Jr.

REVERSE OF 1797
SHELDON PLATE COIN

2041 **1797 S-126 R3, Reverse of 1797, AU58+ PCGS, CAC Approved.** Frosty light brown and tan with slightly darker steel brown toning on the highpoints. A beautiful cent with just a light touch of friction on the highpoints. The only marks are some of the usual tiny planchet chips, mostly at the end of the hair ribbon and inside the left side of the wreath (as struck). M-LDS, Breen state V late. The die crack from the rim to the throat has additional lumps that widen the crack, and the bulge in the field near the crack is just starting to form. Graded AU55 and tied for CC#1 in the Noyes census, his photo #21313. Bland says AU55 and tied with one other example for finest known honors. This cataloger's EAC grade is AU55. This is the Sheldon plate coin for the obverse in *Early American Cents* and both sides are plated in *Penny Whimsy*. Both sides are plated in the 1991 Noyes reference, *United States Large Cents, 1793-1814*. A sharp, beautiful cent that comes with an impressive provenance. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35918.58+/43987714. PCGS population attributed as S-126: 2 in AU58 (1 in 58+); 0 finer (10/24).

Homer Kennedy Downing, an employee of Western Electric Company, was born in Brazil, Indiana, on May 15, 1898, and died on May 29, 1951, at the age of 53. His education took place at DePauw University and Rose Polytechnic Institute, both in Indiana. He was introduced to large cent collecting by T. James Clarke in the 1940s and went on to form an exceptional cabinet of 390 pieces with an emphasis on provenances. With an interest in photography, he established an extensive photo-file of large cents, and many of his photographs were used by Sheldon in *Early American Cents*. Just prior to his death, he identified his Lettered Edge large cents by inking the letters H and D in HUNDRED. New Netherlands sold his collection in the 1952 ANA Sale. He married Anna Rybak in 1928 and they had no children. His WWII draft card described his physical appearance: 6 feet tall, 170 pounds, brown eyes, black hair, and a light complexion.

REVERSE OF 1797
DOUBLE STRUCK

2042 **1797 S-127 R4, Reverse of 1797, AU55 PCGS, Double Struck.** Glossy steel brown and chocolate brown with two streaks of darker steel brown toning on the reverse intersecting in the center of the wreath. Smooth except for some faint roughness in the field before the portrait and a shallow spot of fine roughness under the first A in AMERICA. The only notable contact marks are a collection of nicks in the dentils right of the bust tip. No verdigris. EDS, Breen state I, before any bulges or die cracks in the obverse fields. Boldly double struck. The first strike was centered on the planchet but the cent failed to eject from the coining chamber and was struck a second time. The second strike is rotated about 10 degrees clockwise and shifted to the bottom. The date on the first impression remains visible, especially the upper half of the second 7 that is quite obvious in the drapery, and LIBERTY is strongly doubled as well. Additional evidence of the first strike shows on both sides. Not only is this a dramatic mint error, this cent is (arguably) the finest known example of the variety. Graded AU50 net VF30 and tied for CC#1 honors in the Noyes census, his photo #21445. Bland says EF40 and finest known by 10 points. This cataloger's EAC grade is AU50 net VF35. A very impressive cent, and it comes with a nice provenance that has been traced back nearly a century. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35921.55/11483719. PCGS population attributed as S-127: 1 in AU55; 0 finer (10/24).

James Greiss Macallister, born on February 7, 1892, in Philadelphia, was a prominent numismatist known for his expertise in United States coins, particularly colonials and early coppers. His World War II draft registration card lists his occupation as "Numismatist," and he resided at 5647 N. 16th Street in Philadelphia. The son of J. Wylie and Martha (Greiss) Macallister, he was married to Irene Tollinger, as noted on his death certificate dated October 12, 1945. He passed away at the age of 53. A life member of the American Numismatic Association, Macallister is best remembered for cataloging the Howard Newcomb collection shortly before his death. He contributed extensively to Wayte Raymond catalogs and wrote articles for Raymond's *Coin Collector's Journal*. Although he did not operate a shop, Macallister conducted significant private business and often exhibited rare coins at ANA conventions. Notably, his advertisements emphasized that he was not a dealer and had nothing for sale, highlighting his focus on collecting rather than trading. His obituary in the *Philadelphia Inquirer* reflects his respected status within the numismatic community.

The owner of Mason-Dixon Coin Exchange in Baltimore, Thomas Pettit Warfield also formed an extensive personal collection that was cataloged by Walter Breen and sold by Associated Coin Auctions in October 1955. He was born on November 21, 1907, and passed away on December 26, 1969. Two days later, the *Baltimore Sun* published a notice: "The Maryland Numismatic Society deeply regrets the passing of our Charter Member and Advisor, Thomas Warfield, and extends sympathy to the family." A graduate of Johns Hopkins University, Warfield also worked in the insurance business. His obituary in the *Baltimore Sun* notes: "For the past 10 years his main interest had been his lifelong hobby, numismatics, and he was president and operator of the Mason-Dixon Coin Exchange, one of the largest firms of its kind in this part of the country."

Early American Coppers charter member #79, Charles Douglas Smith was born on June 17, 1914, and died on September 20, 1999. Residing in Brooklyn, New York, he was employed in the railroad business until his retirement in 1981. An avid large cent collector whose interest began in 1947, Smith followed the guidance of Homer K. Downing and Dr. William H. Sheldon, forming several collections over many years. He is remembered for his belief that a collector can appreciate a coin only after he has owned it three times. He provided cataloging assistance to Stack's for several important sales from the 1950s through the 1980s, including the Floyd Starr Collection in 1984. Smith discovered the 1794 NC-4 and 1801 NC-3 varieties.

1797 S-133 CENT, VF DETAILS NO STEMS

2048 1797 S-133 R5, Reverse of 1797, No Stems, VF Details, Filed Rims, PCGS. Glossy medium brown and chocolate, possibly recolored but nicely done if true. The surfaces are mostly smooth and this cent has nice eye appeal, but there are several marks on the rims. The rim at RTY has been filed down to minimize some dents in that area, and there is a rim dent at the D in UNITED. Otherwise just minor marks including a round nick on the rim under the 9 and small planchet chip left of the first A in AMERICA. M-LDS, Breen state IV, with a fine die crack from the dentils to the bottom of the neck in addition to the strong die clashmarks normally seen on the obverse of this variety. This cataloger's EAC grade is net VG10+. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35987.82/44293942.

Ex McLaughlin & Robinson Auctions 6/1988:206-COL Steven K. Ellsworth.

Rarity ratings provide an indication of the relative availability of specific varieties. Several different scales are used in various coinage series. The most popular rating scale, used for early copper coins and other specialties, is the so-called "Sheldon Scale" from R.1 to R.8. The most plentiful varieties are assigned the R.1 rating, and the rarest varieties are described as R.8. The basic scale is modified with plus and minus signs, sometimes described as high and low within the basic range. The higher ratings are typically based on the exact number of examples known, while the lower ratings such as R.1 and R.2, are estimates based on observations.

PLATE COIN

2049 1797 S-134 R4, **Reverse of 1797 with Small Fraction, AU Details, Surfaces Smoothed, PCGS**. A very sharp cent that was cleaned and retoned, but we can find no evidence of the cent having been "Smoothed." The obverse is an attractive frosty light olive brown and steel; the reverse is a lighter shade of golden brown blending to olive. The only notable marks are two small planchet chips in the field left of the hair ribbon (as struck), and stains of darker brown toning at the left ribbon loop and at the first A in AMERICA. A glass reveals a couple traces of extremely fine roughness on the reverse (not to be confused with the roughness from die rust at NE into the wreath). Similar die rust is evident on the neck and bust (presents as tiny lumps on the coin). MDS, Breen state III, with a crack at the top of the 97 and a second very fine die crack to the top of the E in AMERICA. This variety has a Small Fraction (the two 0's are clearly smaller than normal), and this feature is noted in the Breen encyclopedia. Graded AU50 net VF35 and tied for CC#5 in the Noyes census, his photo #21043. Bland says EF45 and tied for CC#2. The reverse of this cent is plated in Dr. Sheldon's *Penny Whimsy* and both sides are plated in the 2000 Breen encyclopedia. This cataloger's EAC grade is net EF45. Comes with a very nice provenance. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35933.98/44293918.

Abe Kosoff was born in New York City on December 31, 1912, and died on March 19, 1983, in Palm Springs, California. A graduate of New York University, he started in the coin business in 1937. He opened Numismatic Gallery in 1939 and conducted several auctions in partnership with Abner Kreisberg until 1954. Kosoff conducted additional sales under his own name, including several significant large cent sales such as T. James Clarke, Sloss and Schwartz. He was a founder of the Professional Numismatists Guild in 1954 and served as president from 1954 to 1955 and from 1964 to 1965. Kosoff was a co-author of the *Official American Numismatic Association Grading Standards for United States Coins* and a columnist in *Coin World* and *Numismatic Scrapbook* magazine. He received the ANA Farran Zerbe Award in 1972 and was elected to the organization's Hall of Fame in 1982.

The surfaces are lustrous, especially the obverse fields, and this cent has excellent eye appeal. The only marks, and they are trivial, are three small spots of darker toning around the 79, another in the field close over the bust, and a planchet flake hidden in the leaves under the I in AMERICA (as struck). M-LDS, Breen state IV. The thin die defect over the C in AMERICA is clear and there is a very shallow low spot (caused by debris on the die) over the N in ONE. Probably from the famous Nichols Hoard of mint state cents dated 1796 & 1797. This cataloger's EAC grade is MS62+, very close to MS63. A great date or type coin. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. (The reverse of the holder is scuffed.) #35936.64/32788966. Otherwise this cent is beautiful with a hint of friction on the highest points of the devices. Just a few trivial marks including a dark spot at the dentils left of the first S in STATES, a light nick over the N in ONE, and a few microscopic planchet chips at the top of the reverse. MDS, Breen state III, with the usual blunted details on the reverse and a fine die crack from the rim through the R in AMERICA into the wreath. The edge of the planchet shows some of the "Grip Marks" associated with the S-120 and S-121 die varieties--the only variety other than those two we have seen with this feature. There is just a light touch of wear on the devices but the eye appeal is affected by numerous tiny planchet chips (as struck). The chips, which unfortunately tend to plague this variety, are located mostly on the portrait and in the center of the reverse, and none of them is significant in its own right. No spots, stains, or contact marks, but there is a fine planchet lamination at the dentils over the second S in STATES that can help identify this cent. E-MDS, Breen state III, with subtle bulging at ICA and a fine die crack from the rim to the right end of the wreath ribbon. The repunching under the first S in STATES is obvious. Édouard Frossard (1837-1899) was born near Geneva, Switzerland and immigrated to the U.S. in 1858. He was a veteran of the Civil War, wounded twice and cited for bravery several times. In his numismatic literature reference, John Adams writes: "Frossard early on demonstrated the impetuosity which characterized much of his professional life." During his numismatic career that began in 1877, Ed. Frossard conducted 160 auctions, published a house organ titled *Numisma*, wrote *Monograph of the United States Cents and Half Cents 1793-1857*, and co-authored *Varieties of the United States Cents of the Year 1794* with William Wallace Hays. Adams discussed his series of sales: "Beginning with sale one in September 1878, the series is distinguished both by features and by content. In terms of content, the Frossard catalogs represent great variety and cumulatively, great knowledge. His comments regarding competitors and competitive practices, some of them quite lengthy, are highly amusing if nothing else."

1797 S-143 CENT, XF40 NO STEMS

2058 1797 S-143 R5, Reverse of 1797, No Stems, XF40 PCGS. Mottled mix of light brown, chocolate, and darker olive brown. Extremely fine roughness shows in the darkly toned area on the right side of the reverse. The upper part of the obverse and lower part of the reverse are softly struck, a result of die faces that were not perfectly parallel. As a result the forehead is covered with small planchet chips with less-obvious chips around LIBERTY and the lower reverse. Otherwise just minor contact marks scattered over both sides, none notable. LDS with obvious die rust in the field before the portrait (visible as tiny lumps on the coin). Die clashmarks show on both sides, strongest behind the head. Not the most attractive cent in this collection thanks to the uneven toning and uneven strike, but still one of the finest of the variety in the condition census. Noyes says EF40 net VF20 and tied for CC#5, his photo #63356. Not seen by Bland. All but one of the better ones is net graded for defects. This cataloger's EAC grade is net VF30. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35990.40/15003879. PCGS population attributed as S-143: 3 in XF40; 2 finer (10/24).

Ex Douglas F. Bird 1999-Dr. Wallace Lee, McCawley & Grellman Auctions/Superior 5/25/2003:431 ($5175)-COL Steven K. Ellsworth.

Robert Scot's Draped Bust design debuted on the one cent coins in 1796 and continued through 1807. There are 35 varieties of 1796 Draped Bust cents known, and those varieties were minted from 20 obverse dies and 21 reverse dies. The 1797 cents include 34 varieties that were struck from 21 obverse dies and 20 reverse dies. Collectors of the 1796 and 1797 cents have a significant challenge. The 1796 Draped Bust cents include eight varieties rated R.3, six varieties rated R.4, 13 varieties rated R.5, four others rated R.6, two rated R.7, and two that are R.8. The 1797 cents are also challenging for collectors with seven varieties rated R.1 or R.2, six varieties rated R.3, four rated R.4, eight rated R.5, three rated R.6, two rated R.7, and four rated R.8.

1797 NC-1 CENT, VF DETAILS REVERSE OF 1795, PLAIN EDGE

2059 1797 NC-1 R7, Reverse of 1795, Plain Edge, VF Details, Environmental Damage PCGS. Mostly glossy dark olive and steel with lighter chocolate toning on the highpoints. The highpoints are smooth but fine to moderate roughness covers the fields and protected areas. The only notable mark is a small pin prick over the end of the right wreath stem. Traces of verdigris show in protected areas, mostly on the reverse. Poorly struck from misaligned dies with significant weakness at the bottom of the obverse and top of the reverse. The date is essentially gone as is STATES OF thanks to the misaligned dies but everything else is clear. The obverse is badly misaligned to K-3 and the planchet is oblong measuring 29.5mm x 30.5mm. EDS, Breen state I, before the die crack at BER. Only 9 examples of the variety are known and all of them are improperly struck to some degree. It appears the press was malfunctioning or improperly configured when this die pair was placed into service for a limited number of strikes. Graded VF20 net G5 and tied for CC#3 in the Noyes census, his photo #28816. Bland says EF40 net VG8 and CC#2. This cataloger's EAC grade is net G6. The census for the 9 known examples in the Noyes census is 20-6-5(2)-4-3-2(2)-1. The Bland census contains only 7 examples with grades of 25-8-7-6-5-3-2. All are net graded thanks to defects. This is one of the most difficult varieties to obtain in the entire Sheldon series. Obviously it is not a variety for the collector focused solely on choice cents; rather it is intended for the collector whose goal is to complete a collection that includes all the die varieties including all 52 of the "noncollectibles" (NC's) from 1793 to 1814. No collector has ever achieved that goal. Daniel W. Holmes, Jr. came the closest falling one variety short in 2008 lacking only the unique 1793 NC-5 that is impounded in the ANS Collection. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35891.97/43878527.

Robinson S. Brown, Jr. was a prominent figure in the history of large cent collecting, known for assembling complete collections of Sheldon-numbered varieties on two occasions. Born in 1917, he dedicated five decades to Brown-Forman Distillers in Louisville, Kentucky, renowned for Jack Daniel's whisky, and retired as chairman of the board in 1982. Brown's first collection of large cents (1793-1857) was sold by Superior in 1986, followed by his second collection (1793-1839) a decade later. A third auction in 2002 featured late-date cents from his holdings. He passed away on July 28, 2005.

1797 NC-2 CENT, VF DETAILS REVERSE OF 1797

2060 1797 **NC-2 R6, Reverse of 1797, VF Details, Environmental Damage, PCGS**. Slightly glossy dark olive brown with slightly lighter chocolate toning on the highpoints. The surfaces are covered with fine roughness, strongest on the left side of the obverse, and there are traces of waxy verdigris in a few protected areas. A small chip at the curl under the hair ribbon is the only notable mark. The area at the date and through the bust into the field appears to be coated with remnants of a protective substance, perhaps lacquer or "Care." LDS, Breen state II, with a clearly defined rim cud at D-ST (which unfortunately is hidden by the holder). Graded VF20 net VG8 and tied for CC#5 in the Noyes census, his photo #23055. Bland says VF25 net VG10 and tied for CC#2. This cataloger's EAC grade is net VG10. The finest piece is in the ANS collection, a net-graded F15 coin that is porous and has rim dents. The Noyes census of the top coins is 20-10(3)-8(4)-7(4), and all are net graded. The Bland census is 15-10(4)-8(5)-7(4), and most are net graded. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35960.97/43878528.

Dr. Robert A. Schuman, a native of Baltimore, is a retired radiologist who lives near Scranton, Pennsylvania. His collecting interests began at the age of 10, and he once worked for Thomas Warfield at the Mason-Dixon Coin Exchange. During that employment from 1958 to 1963, Schuman learned to attribute and appreciate large cents, with a special interest in 1794s. In 1971 he realized that the 1794 S-19b in the Masters Sale was misattributed as S-18b, and acquired the coin at that sale, achieving national recognition among large cent collectors. Schuman recently sold the finest set of 1794 Head of 1793 cents in collectors' hands, and he has assembled a superb collection of Hard Times tokens, also recently sold.

1797 NC-3 CENT, GOOD 4
REVERSE OF 1797

2061 1797 NC-3 R6-, Reverse of 1797, Good 4 PCGS. Slightly glossy chocolate and dark steel brown. Covered with fine porosity, strongest around the ribbon bows at the bottom of the wreath where there are a few specks of verdigris. A tiny scratch between the R & T in LIBERTY is the only notable contact mark. EDS. The date is strong and the legends are readable except for weakness on the denominator. Struck with the obverse slightly misaligned to K-1. Graded VG8 net G4 and tied for CC#11 in the Noyes census, his photo #62761. Not seen by Bland. This cataloger's EAC grade is net G5. The best examples in the Noyes census grade 10-7(4)-6-5(4)-4(4); the finest is in the ANS Collection and all of these are net graded. The Bland census is 15-8-7(3)-6-5(2)-4(4). Another rare variety that is unknown in high grade. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35963.04/15004122. PCGS population attributed as 1797 NC-3: 1 in G4; 1 finer (10/24).

Ex McCawley & Grellman Auctions/Superior 9/5/2004:320 ($1955)-John Pijewski, McCawley & Grellman Auctions/Superior 5/29/2005:1275 ($1725)-COL Steven K. Ellsworth.

When Dr. William H. Sheldon compiled his variety guides for the early cents, he labeled the rarest varieties as non-collectible, and gave them special "NC" variety identifications. Sheldon considered varieties with just one or two examples available to collectors as essentially unobtainable. As information became available and collectors examined their holdings, some of these NC varieties fell outside the established population. Those varieties retained their NC numbers, but now in italics, with the new name of "now-collectible." Sheldon observed: "The great advantage in listing the NC's separately for each year is that when a new variety is discovered, the new discovery takes its place in the NC list for that date without disrupting or in any way affecting the straight-through list of established Collectibles."

1797 NC-5 CENT, VG10
REVERSE OF 1797

2062 **1797 NC-5 R6, Reverse of 1797, VG10 PCGS.** Glossy chocolate brown with darker chocolate and olive brown in protected areas. Smooth without any corrosion or verdigris, but there are some contact marks. The notable marks are a few nicks in the hair left of the eye, small nicks scattered in the obverse fields, and a disjointed scratch down at the O in ONE and C in CENT. M-LDS, Breen state III late, with clear die cracks at RTY. This cent has nice eye appeal in spite of the minor contact marks. The date and legends are strong except for the 9, which is clear but weakly struck, perhaps due to a die clog. Called net VG8 and tied for CC#6 in the Noyes and Bland census lists, Noyes photo #23042. This cataloger's EAC grade is VG8+. The Noyes census of the top examples is 35-30(3)-12-10-8(3)-7-5(5); all but one are net graded. The Bland list of top pieces is 40-35-25-12-10(2)-8(3)-7(2). Comes with a nice provenance. Daniel W. Holmes, Jr. acquired this cent following the American Numismatic Rarities auction of the Dr. Haig Koshkarian Collection. A Cleveland, Ohio native, Holmes served as Early American Coppers vice-president from 2002 to 2005 and president from 2005 to 2009. He earned an MBA from the Stern School of Business at New York University. Holmes was chairman and CEO of Cleveland-based Morrison Products, manufacturers of fans and blowers for the HVAC industry. In addition to his service on the board of the American Numismatic Society, Holmes served industry trade associations and he was a member of the manufacturing council that advised President Bush and President Obama. Holmes lost his battle with ALS in 2016 at age 77. The Daniel W. Holmes, Jr. large cent collection was the most complete ever formed and lacked only two unique varieties that never became available.

1797 NC-6 CENT, AG3
REVERSE OF 1797
SEMI-UNIQUE

2063 **1797 NC-6 R8, Reverse of 1797, AG3 PCGS**. Glossy steel brown and chocolate. The planchet is smooth and this cent is quite nice considering the amount of wear. The only significant marks are some fine scratches that intersect in the right center of the reverse. The date and LIBERTY are clear but much of the reverse is worn smooth thanks to significant swelling in the center than obliterated ONE CENT. LDS with the reverse rotated about 20 degrees clockwise relative to the normal head-to-foot die orientation. Only two examples of this variety are known. This one is graded Fair 2 "Choice" in the Noyes census, his photo #27708. The finer example in the Noyes census is graded 7/4 "Scudzy" with rough surfaces, a bent planchet, and many contact marks. Bland says AG3 for this example and VG7 net G4 for the other example. This cataloger's EAC grade for this piece is net Fair-2+, close to AG3. Since this variety was discovered in 1957 (the net G4 piece) only one additional example has been found in spite of diligent searching--the one offered here. A piece for the collector who is "going for all of them." The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #35972.03/15003878. PCGS population attributed as 1797 NC-6: 1 in AG3; 0 finer (10/24).

John Weston Adams is a Boston investment banker and a dedicated member of the numismatic community. He serves as a trustee of the Massachusetts Historical Society and is a fellow of both the American Antiquarian Society and the American Numismatic Society. Born in Boston on April 2, 1936, he pursued his education at Princeton and Harvard, earning an MBA in 1960. Adams has a wide-ranging passion for numismatics, most notably recognized for his world-class collection of 1794 large cents, which was sold by Bowers and Ruddy in 1982. He has made significant contributions to the field, including editing *Monographs on Varieties of United States Large Cents, 1793-1794*, and compiling a two-volume reference on numismatic auctions from the 19th and 20th centuries. His published works include *The Indian Peace Medals of George III* (1999), *The Medals Concerning John Law and the Mississippi System* (2006), *Comitia Americana and Related Medals* (2007, co-authored with Anne Bentley), and *The Medallic Portraits of Admiral Vernon* (2010, co-authored with Fernando Chao). In 2016, John and his wife, Regina, were honored with the American Numismatic Society's Trustees' Award. Additionally, he has served as president of both the Medal Collectors of America and the Numismatic Bibliomania Society.

Mostly smooth but there are a few small planchet flakes on the cheek, a larger one on the on the forehead just above the eye, a smaller one on the bust, and traces of microscopic roughness near the dentils before the face and off the upper end of the hair ribbon. No verdigris or notable contact marks. MDS, Breen state II late, with an obvious bulge across the reverse from TA in STATES to ER in AMERICA, but the reverse is uncracked. The edge is diagonally reeded which is normal for this variety. Sharply struck and attractive in spite of the minor planchet issues on the obverse. Graded EF40+ net VF35 and CC#1 in the Noyes census, his photo #22947. Bland says VF35 and CC#2 behind a sharper but lightly corroded example. This cataloger's EAC grade is net VF35. Only two examples are graded above VG10 in both census lists. This cent is plated in the 1931 Clapp reference *The United States Cents of the Years 1798-1799*, Dr. Sheldon's *Early American Cents* and *Penny Whimsy*, and in the 2000 Breen encyclopedia. Probably lightly cleaned and nicely retoned after light smoothing in the obverse fields to minimize tiny pits. No verdigris or contact marks; a small chip out of the rim over the R in AMERICA is the best identifying mark. The pits are not too distracting because they are mixed in with the die rust (tiny lumps on the coin) associated with the late die state. LDS, Breen state IV, with extensive die rust evident on both sides, especially on the bust and in the field near the dentils on the obverse. The shoulder loop and drapery at the bust tip have been ground off the die. Graded EF45 net VF20 and tied for CC#4 in the Noyes census, his photo #22370. Bland says AU50 net VF30 and CC#3. 2068 **1798 S-148 R2, Style I Hair, Large 8, AU Details, Surfaces Smoothed, PCGS**. A sharply detailed cent that was lightly burnished and retoned glossy chocolate and steel with darker olive brown in protected areas. Essentially void of marks or other distractions. A speck of darker toning in a depression under the R in AMERICA can help identify this cent. EDS, Breen state I, with an uncracked obverse. This cataloger's EAC grade is net VF35. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36023.98/44279318.

2069 1798 S-149 R5, Style I Hair, Large 8, VG10 PCGS. Glossy chocolate and steel brown blending to darker chocolate in protected areas. The surfaces are smooth, which is unusual for this tough variety. The only significant contact mark, and it does catch your eye, is an old horizontal scratch in the field before the lower lip. The date is bold and the legends are strong. Nicely struck EDS, Breen state I, before any trace of a bulge at S-OF-A. Graded F12 net VG10 and tied for CC#2 in the Noyes census, his photo #39214. 1798/7 S-150 CENT, VF35 OVERDATE

2070 1798/7 S-150 R5, Overdate Small 8 over 7, VF35 PCGS. Glossy chocolate brown with medium brown toning in protected areas, especially on the reverse, and a small area of dark olive brown toning under the bust tip. The surfaces are smooth but there are small nicks on both sides, mostly on the obverse. The notable nicks are a thin one in the field close behind the head, another close to the curl below the hair ribbon, and two small ones under the O in ONE. LDS, Breen state IV, with strong die buckling at OF-AME. The date and overdate are bold and the legends are strong except for strike weakness at ENT. The edge is partially reeded (Breen Edge V with fine diagonal reeds). Called VF35 net VF20 and CC#4 in the Noyes census, his photo #27837. Bland says F15 and tied for CC#7. The Draped Bust coinage of 1798 and 1799 presents a significant challenge for collectors. While 1798 is considered a common date, there are many varieties. Alternatively, there are just three 1799 varieties, but the date is a key to the Draped Bust series. For the 1798 series, 46 varieties are identified from 32 obverse dies and 34 reverse dies. The three 1799 varieties are combinations of two obverse dies and three reverse dies. The 1798 large cent varieties include 13 rated R.1 or R.2, 12 rated R.3, 10 considered R.4, nine rated R.5, and two rated R.7. The three 1799 varieties are considered R.2, R.4, and R.7.

A physician and psychologist with the Presbyterian Hospital in New York City, Dr. William H. Sheldon developed an interest in large cents at a young age while working for the Chapman brothers. He was the author of *Early American Cents* in 1949, and *Penny Whimsy* in 1958. Sheldon developed the 70-point grading scale that is familiar to today's collectors. His grading scale was based on the value of common varieties of 1794 large cents. He formed three different large cent collections. His first collection was sold to Charles Fisher in 1932 to finance his medical education. His second collection including 566 large cents consigned to Stack's for sale in October 1938. His third collection that included all collectible early cent varieties as well as 30 NC varieties was sold to Roy E. Naftzger, Jr.

The Certified Acceptance Corporation was founded in November 2007 to examine certified coins to ensure they meet the higher standards of the founders. The website, CACgrading.com, explains: "Notable inconsistencies exist among certified coins of the same grade. Such discrepancies can inadvertently impact the value of any given coin. As a result, prices for high-quality coins are tethered to their lesser-quality counterparts and suppress the entire market." A CAC green approval sticker, known as a "green bean," is affixed to certification holders for those coins that meet their standards. Rare instances of a gold approval sticker identify coins that exceed the strict CAC standards. The year 2022 saw the beginning of the related CAC grading service.

Byron Reed was born in Darien, New York, on March 12, 1829, and lived in Ohio and Wisconsin Territory before finding his home in Omaha, Nebraska. He arrived in Omaha in 1855 and opened a real estate office. He became active in local government, serving as city clerk in 1860, councilman in 1871, and city council president in 1872. He and his wife (Mary Melissa Perkins) were married in April 1862 and had two children. In 1890, Reed served on the Assay Commission, just a year before his death on June 6, 1891. A benefactor of the city, Reed donated land for the free public library building and a house that later became the first Boy's Town, operated by Father Flanagan. An active coin collector, he acquired an impressive collection of coins, patterns, currency, and medals, including an 1804 silver dollar. His entire cabinet, along with a collection of autographs, was donated to the Omaha Library. A portion of the coins and autographs were sold in 1996, and the remainder is displayed at the Western Heritage Museum.

The famous large cent aficionado, George Hubbard Clapp, who donated his collection to the American Numismatic Society, devoted his retirement to the study of his favorite coins. His study began with *The United States Cents of the Years 1798-1799*. The book was published in a limited print run of 135 copies. Clapp's study was meticulous, and just one new variety, the 1799 NC-1, was discovered after his book was published.

1798 S-160 CENT, MS62 BROWN STYLE ONE HAIR

2080 1798 S-160 R3, Style I Hair, Small 8, MS62 Brown PCGS. Frosty light to medium brown and steel with steel brown overtones on the obverse. There are two small, darker spots of fine carbon in the field before the face and a swipe of similar toning through the E in CENT. A thin, curved planchet void near the dentils left of the L in LIBERTY (as struck), can help identify this cent. MDS, Breen state III, with die clashmarks from dentils off the end of the bust. Shallow low spots cover the bust and shoulder with similar low spots around the T in CENT, all caused by shallow debris stuck on the dies. Graded MS60 and CC#1 by 15 points over the second finest example in the Noyes census, his photo #23077. Bland says MS60 and tied with the ANS coin for finest known honors. This cataloger's EAC grade is MS60. A sharp, attractive example of a variety that is difficult to find in high grade. Plated in both the 1991 Noyes reference and the 2000 Breen encyclopedia to illustrate the variety. Comes with a nice provenance that can be traced back unbroken for well over a century. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36044.62/32783210. PCGS population attributed as S-160: 1 in MS62 Brown; 0 finer (10/24).

William Hartman Woodin, born on May 27, 1868, at Berwick, Pennsylvania, was a graduate of the Columbia University School of Mines. He served as general superintendent of the Jackson and Woodin Manufacturing Company, which built railroad cars and equipment. He later served as president of the American Car and Foundry Company and the American Locomotive Company. He served as secretary of the Treasury under President Franklin Roosevelt from March 5 to December 31, 1933. During this time the president declared a banking holiday and ceased the production of gold coinage. Woodin was a noted collector of pattern coins who once owned the two 1877 half union gold coins that he returned to the Mint in exchange for "several crates" of patterns. Woodin was an exhibitor at the 1914 ANS exhibition and wrote a reference on pattern coins with Edgar Adams. He died on May 3, 1934, in New York City.

STYLE ONE HAIR

2082 1798 S-162 R4, Style I Hair, Small 8, XF45 PCGS. Glossy dark olive brown and steel with slightly lighter steel brown toning on the highpoints. The surfaces are reasonably smooth but a glass reveals microscopic roughness under the glossy patina. There are traces of verdigris in protected areas. Although the surfaces are imperfect they are good enough to pass muster at PCGS. The only notable marks are two rim nicks right of the date. M-LDS, Breen state II late, with bulges in the obverse fields, strong die clashmarks at the top of the wreath, and a fine die crack over OF-A. Virgil Brand financed the collecting interests of his cousin, Carl Wurtzbach, who formed a collection of 164 cents that were transferred to Brand in 1919. Wurtzbach was born in Germany on May 3, 1864, and died in Boston, Massachusetts on August 30, 1947. An obituary in the *Berkshire County Eagle* described him as a "utility and banking executive, civic improvement leader, historian, coin collector and former postmaster" of Lee, Massachusetts. At the time of his death, he was president of the Lee National Bank, having served on its board of directors for more than 20 years. His obituary further states: "One of his greatest hobbies was as a coin collector. One of the best-known coin collectors in the country, he was a noted authority on Colonial coinage and large copper cents."

2084 **1798 S-164 R4, Style I Hair, Small 8, AU55 PCGS.** Glossy medium chocolate brown and steel with lighter brown toning in protected areas on the reverse. Mint frost shows in the fields and the eye appeal of this cent is quite nice. The only marks are a couple tiny nicks above AT in STATES and a larger one under that T. M-LDS, Breen state VI. Extensive die erosion and clashmarks cover most of the right side of the obverse down to the date with obvious swelling at the date into the field behind the curls. A fine radial die crack extends from the dentils behind the head into the field above the ribbon where it fades out. A neat die state for this obverse and the details are very sharp. 2088 1798 S-168 R3, Style II Hair, Small 8, MS62 Brown PCGS. The obverse is a glossy mix of olive and chocolate brown; the reverse is mostly light tan with an area of darker chocolate brown toning at AME into the wreath. Satiny mint luster covers the fields and protected areas, especially on the obverse, and the eye appeal of this cent is very nice. The notable marks are a diagonal nick in the field off the lower end of the hair ribbon, another left of the lower curls, and a tiny tick right of the ear lobe. LDS Breen state IV. Die clashmarks show on the obverse and all the die cracks listed by Breen for the reverse are present. In addition the reverse die is covered with microscopic lumps caused by fine but extensive die rust. The roughness in the darkly toned area on the reverse is die rust, not corrosion. Graded MS60 net AU50 and tied for CC#2 in the Noyes census, his photo #20381 (although he listed it as MS60 in his 1991 census). Bland says MS61 and CC#1. This cataloger's EAC grade is AU58. Hollinbeck Coin Company was founded in 1928 by R.O. Hollinbeck in Minneapolis. Five years later, Hollinbeck hired a 13-year-old named Arthur Kagin. Kagin became a full-time employee two years later and was soon engaged in the formation of company branches in Omaha and Des Moines. John Adams observes: "With a foundation now in place, Kagin set out to build the house. The problems he faced were seemingly insurmountable: there were no sources of coins in Iowa and, at the time, very few collectors. He attacked both problems simultaneously." The firm later operated under the Hollinbeck-Kagin Coin Company name, and finally as Kagin's, all in Des Moines, Iowa. Beginning with their first auction in 1940, Art and brother Paul Kagin took over the company and conducted many auctions, usually 10 to 12 a year. A number of important individual large cents have appeared in their sales over the years; their single most important copper sale is the Philip Van Cleave auction in 1986.

1798 S-169 CENT, MS61 BROWN STYLE TWO HAIR

2089 **1798 S-169 R3, Style II Hair, Small 8, MS61 Brown NGC**. Glossy light to medium brown with darker steel brown toning on the highpoints and tiny specks of darker toning scattered over both sides. A larger spot of dark toning in the hair below the B contains traces of fine carbon. Frosty luster covers the protected areas on both sides. The specks are distracting; C. Douglas Smith called them the "Speckled Trout Effect." The best identifying marks are a streak of darker toning from the cheek to the shoulder and a tiny diagonal nick right of the base of the 7 in the date. M-LDS, Breen state IV. A bulge near the dentils tips extends from above LIBERTY clockwise to the rim opposite the chin. The repunching on RICA is clear. This cent was graded MS60 by Doug Smith. He acquired it from Dr. Shalowitz in 1987 for $3000 cash, 3 MS 1818 Cents, and 3 MS 1819 Cents (total cost to Doug $6500). The complete story is described in notes inside Doug's collection envelopes, which are included. Graded AU55 net EF40 and tied for CC#4 in the Noyes census, his photo #23142. STYLE TWO HAIR

2090 1798 S-170 R3, Style II Hair, Small 8, AU53 PCGS. A choice, lustrous cent with just a hint of friction on the highest points, but there is a significant planchet defect. Several small planchet voids show at the dentils left of the date and there is a larger fissure at the leaf tips below ES-OF-A, as struck. The fissure on the reverse does catch your eye. The only notable signs of contact are a couple rim nicks at the U in UNITED and lighter ones at the O in OF. Glossy steel brown with frosty tan in protected areas, especially on the reverse. LDS, Breen state IV, with an arc crack in the field behind the portrait and a fine radial crack through the T in LIBERTY into the hair. Graded AU50 net VF35 and tied for CC#4 in the Noyes census. This cataloger's EAC grade is net VF35. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. (The reverse of the holder is scuffed.) #36080.53/15001272. PCGS population attributed as S-170: 1 in AU53; 1 finer (10/24).

John R. "J.R." Frankenfield was a native of Jamestown, New York, who moved to Florida and began a construction business at a young age, following two years in the Army. His company was active in the development of the Miami, Florida area. He was the ninth collector to complete a set of Sheldon-numbered varieties, including the great rarity S-79. He also formed extensive collections of half cents and later-date large cents. Another of his hobbies was travel, with a goal of visiting every one of the 3,142 counties in the United States, taking a photo of the county courthouse in each locale. Superior Galleries sold the Frankenfield Collection in February 2001.

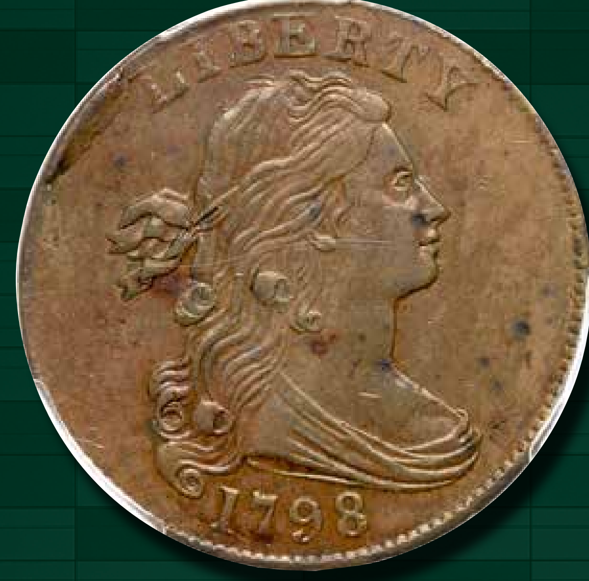
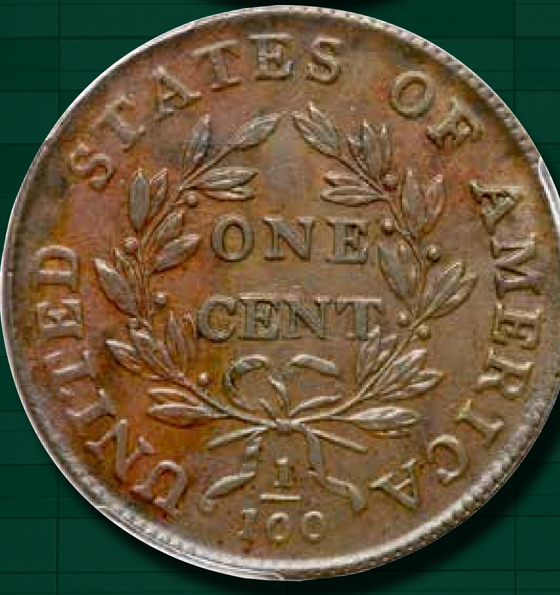
STYLE TWO HAIR
NOYES PLATE COIN





2091 1798 S-171 R4, Style II Hair, Small 8, AU58 PCGS. Glossy tan and light brown with specks of darker brown and reddish chocolate on the obverse and reddish brown on the left side of the reverse. A spot of reddish chocolate under the hair ribbon contains a speck of verdigris and fine corrosion. There is just a touch of wear on this cent and the only notable contact marks are a nick under the B in LIBERTY and a tick low on the neck. M-LDS, Breen state IV, with a cud break left of the L in LIBERTY; the repunching on CA has faded away. Graded AU50 net EF40 and tied for CC#1 in the Noyes census, his photo #20525. Bland says EF45 and tied for CC#2. This cataloger's EAC grade is EF45. This is the plate coin for the variety in the 1991 Noyes reference and the reverse is plated in Dr. Sheldon's *Early American Cents*. Comes with a great provenance that has been traced back unbroken for over 100 years. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36083.58/13457937. PCGS population attributed as S-171: 1 in AU58; 0 finer (10/24).

Samuel Hudson Chapman, born in Philadelphia on July 15, 1857, and passing away on September 22, 1931, was the elder of the Chapman brothers. Alongside his younger brother, Henry, he conducted many significant auctions, continuing to do so after their separation. Samuel authored *United States Cents of the Year 1794*, published in 1923 but recalled due to errors, with a revised edition released in 1926. Described by Lapp and Silberman as "slender, wiry, with a large, full moustache," he was a modest man despite his extensive knowledge of numismatics. Henry Chapman, born on October 18, 1859, in Philadelphia, died on January 4, 1935. He began his career at 16, working for John Haseltine, and famously discovered the Starred Reverse large cent variety in 1878 while preparing the Bispham Collection for auction. After separating from Samuel, Henry also conducted numerous important sales, with his wife, Helen, managing their retail storefront until 1948. Lapp and Silberman portray Henry as "a tall man, fairly heavy, with a full head of hair, a heavy moustache, and a bushy beard," while Dr. Sheldon recalled him as having "twinkling gray eyes." Collectors regarded Henry Chapman as one of the most colorful figures in numismatic history.

DISCOVERY COIN FOR S-178

2098 1798 S-178 R5+, Style II Hair, Reverse of 1795, VF35 PCGS. Mostly glossy dark olive brown and chocolate. The obverse is covered with fine porosity mixed with extensive die rust while the reverse is mostly smooth, only minor roughness on the left side. The roughness was not severe enough to move the graders at PCGS to assign a "Details" grade. No verdigris and just a few minor marks. A dull chip over the N in CENT and a couple short scratches right of the denominator are the notable marks. M-LDS, Breen state III late, with extensive die rust on the obverse and strong die cracks through the date. This is the discovery coin for the variety, first identified by James A. Walker prior to 1913. Both sides were plated on page 305 in the June 1913 issue of *The Numismatist* in an article by Dr. Charles E. McGirk announcing the new variety. This is the plate coin for the variety in the Breen encyclopedia and in the 1991 Noyes reference. Graded EF40 net VF20 and CC#2 in the Noyes census, his photo #21802. A series of 18 monthly articles, known as the McGirk Series, appeared in *The Numismatist*. Charles McGirk submitted the first installment that was published in the April 1913 issue. Titled "*United States Cents and Varieties, 1793-1857*," the series certainly had problems for collectors. 1798 S-182 CENT, XF45
STYLE TWO HAIR

2102 1798 S-182 R4, Style II Hair, Small 8, XF45 PCGS, CAC Approved. Glossy light olive brown and steel with lighter brown in protected areas on both sides. There is a small area of darker toning at the rim before the chin, a dark spot between the 1 & 7, and a puff of similar toning above CE in CENT. A microscopic speck of greenish verdigris is attached to the lower end of the hair ribbon; otherwise the surfaces are smooth and void of verdigris. The only notable marks are a couple light rim bruises before the face and a few tiny ticks at the forehead. MDS, Breen state II, with a die clashmark at the throat. Graded VF35 net VF25 and tied for CC#8 in the Noyes census, his photo #39078. This cataloger's EAC grade is VF30. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36113.45/16999828. PCGS population attributed as S-182: 2 in XF45; 1 finer (10/24).

Ex Worthy Coin Company bid board 4/1991:800-Rob Weiner-Benson Collection, Ira & Larry Goldberg 2/16/2001:319 ($1897)-COL Steven K. Ellsworth.

Corrado Romano was the proprietor of Worthy Coin Company in Boston, Massachusetts. The firm was famous for their "bid board," an old-time method of coin sales. Romano was born in Italy in 1903 and died in Massachusetts in 1984. Stack's handled the Romano estate in their June 1987 auction. The 1930 census identifies Romano as a numismatist who was the son of Andrea Romano, a bank president. Romano applied for ANA membership in April 1929 and was approved as a new member the following month. He advertised Romano's Coin Shop in Springfield, Massachusetts in the early 1930s.

STYLE TWO HAIR

2103 1798 S-183 R5, Style II Hair, Small 8, XF40 PCGS. Glossy medium chocolate brown. Smooth and attractive with no verdigris and only trivial contact marks. A light nick over the eye, two short scratches at the A in STATES, and two more under the left stem from the wreath are the notable marks, and they are not distracting. The bottom of the date, the bust, and the top of the reverse are a bit weak, as nearly always on this variety, because the strike is slightly off center to the bottom of the obverse. MDS, Breen state II, with fine die clashmarks on the obverse. Graded VF35 net VF25 and tied for CC#4 in the Noyes census, his photo #27779. Bland says VF30 and tied for CC#4. This cataloger's EAC grade is VF25+. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36116.40/15001233. PCGS population attributed as S-183: 1 in XF40; 4 finer (10/24).

Jackson C. Storm of Glen Cove, New York was an early EAC member who held number 246. Denis Loring handled the sale of his early cent collection to Robert Matthews in 1984. Ray Rauch purchased his middle and late date cents and consigned them to Robert McIntire for a June 1988 auction.

1798 S-184 CENT, MS62 BROWN
STYLE TWO HAIR

2104 **1798 S-184 R1, Style II Hair, Small 8, MS62 Brown PCGS.** Very attractive lustrous steel brown and olive with lighter steel brown toning in protected areas. The surfaces are covered with satiny mint frost and this cent has great eye appeal. There is no rub or friction on the highpoints but there is very shallow reddish brown roughness in protected areas at the bottom of the obverse. The only contact mark is a dull rim nick over the R in LIBERTY; the reverse is flawless. M-LDS, Breen state III, with a faint diagonal die crack in the field before the face and several microscopic lumps of die rust in the obverse fields. The die clashmarks on the reverse are strong. In addition there is fine but clear doubling from the tip of the nose down to the bottom of the neck plus sharp doubling on ONE CENT and the lower part of the wreath (from die shift or "machine doubling"). Graded AU50 net EF40 and tied for CC#11 in the Noyes census, his photo #59763.2. Bland says AU50 and tied for CC#7 in his census. This cataloger's EAC grade is net AU50. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36119.62/38062562. PCGS population attributed as S-184: 4 in MS62 Brown; 0 finer (10/24).

1798 S-185 CENT, AU58+
STYLE TWO HAIR

2105 **1798 S-185 R2, Style II Hair, Small 8, AU58+ PCGS.** Frosty chocolate and darker steel brown with peeps of very faded mint color in protected areas on both sides. A subtle puff of slightly darker toning shows left of the hair ribbon. Sharply struck with excellent eye appeal. The only defects are some microscopic planchet chips on both sides, as struck. The notable chips are near the dentils right of the Y in LIBERTY, near the dentils at D-S, and along the dentil tips at CA to the denominator. The only contact marks are a couple trivial ticks on the chin and a microscopic pin scratch that meanders through the hair left of the eye. There is just the lightest hint of friction on the highest points of the devices. MDS, Breen state IV, with deep die clashmarks from dentils along the top of MERI and fine die cracks in the field before the portrait. Graded AU50 net EF40 and tied for CC#1 in the Noyes census, his photo #36974. We can find no reason for the deduction. The finest listed in the Bland census grades EF45 but Bland never saw this coin. This cataloger's EAC grade is AU55. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36122.58+/32782967. PCGS population attributed as S-185: 1 in AU58 (1 in 58+); 0 finer (10/24).

New York coin dealer Anthony J. "Tony" Terranova has been active in the numismatic scene since the 1970s, specializing in colonial coins and historical medals. After working for a mutual fund in the late 1960s and while working for a commodities exchange in the early 1970s, Tony began dealing in coins part-time in 1972 and made it his full-time career, starting with Neil Berman in 1975. Tony has operated his own rare coin business since 1978. He is known for his superb quality inventory and personal collections.

1798 S-186 CENT, AU53 STYLE TWO HAIR

2106 1798 S-186 R2, Style II Hair, Small 8, AU53 PCGS. Glossy chocolate and darker steel brown with lots of frosty lighter brown and golden tan faded down from mint color in protected areas on the reverse. There are a couple very shallow low spots on the bottom of the neck (caused by debris on the die), a tiny pinprick in the field close off the bust tip, and some tiny ticks at S-O. A speck of greenish verdigris is barely visible in the field over the bust tip, and a few small spots of darker toning are scattered about the reverse, the largest of these right of the F in OF. This cent has excellent eye appeal in spite of the minor distractions. Nicely struck M-LDS, Breen state VII. The small cud break under the fraction touches the first 0 and covers nearly half of the second 0 in the denominator, and additional die cracks extend left from the fraction bar. Graded EF45 net EF40 and tied for CC#3 in the Noyes census, his photo #27559. Bland says EF45 and tied for CC#2. This cataloger's EAC grade is EF45. 1798 NC-1 CENT, VG10 STYLE ONE HAIR

2108 **1798 NC-1 R7+, Style I Hair, Small 8, VG10 PCGS.** Dark olive brown and steel with a hint of gloss. The planchet is covered with uniform fine granularity and there is a very light dusting of fine verdigris in some of the protected areas, mostly on the reverse. There are a few contact marks including a small nick high on the shoulder, a nick at the ear, a small dig at the R in LIBERTY, two dull nicks at the D in UNITED, and another left of the first A in AMERICA. On the good side the date and legends are strong except for some strike weakness at the top of the reverse. MDS, Breen state II early, with a fine die crack through the right foot of the T in LIBERTY into the hair below. Graded VG10 net G6 and CC#5 in the Noyes census of 12-10(2)-7-6-5-3, his photo #27644. Bland says VG7 and tied for CC#4 in his census of 20-10(2)-7(2)-3. (Bland did not see the most recent discovery by Henry T. Hettger, a badly corroded and scratched net G5 example that was sold in the 2009 EAC Sale, lot 141, for $9350.) One of the pieces graded VG10 in both census lists is impounded in the ANS Collection. This cataloger's EAC grade of the example offered here is net VG7. Only 7 examples are known with only 6 available to collectors which makes this and the following NC-2 tied for the rarest variety of the year. A nicely detailed and relatively attractive example of one of the rarest varieties in the entire 1793-1814 series. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36059.10/15000131. PCGS population attributed as 1798 NC-1: 1 in VG10; 0 finer (10/24).

1798 NC-2 CENT, GOOD 6
STYLE ONE HAIR

2109 **1798 NC-2 R7+, Style I Hair, Small 8, Good 6 PCGS.** Slightly glossy medium brown and chocolate blending to dark steel brown in protected areas on the obverse. No corrosion or verdigris but there are some marks including a spot of darker chocolate at the bottom of the neck over the 9, several nicks inside the wreath, and a few light rim bruises on both sides. The date and legends are clear and easily readable except for weakness at OF-A. LDS with an irregular cud break at RTY. Breen thought this was the only die state for the variety but today we know there are three distinct die states: 1--fine crack through top of RTY but no cud, 2--strong crack through RTY with cud over R, and 3--the irregular cud break seen on this example. Only 7 examples are known: one with the fine crack but no cud, one with the strong crack and a cud over R, and five with the strong crack and the irregular cud seen here. Graded G5 net G4 and tied for CC#5 in the Noyes census of 8-7(3)-4(2)-2, his photo #22283. Bland says G6 and CC#4 in his census of 8(3)-6-5. The Bland census is missing two examples. This cataloger's EAC grade is G6. One of the seven examples is in the ANS Collection (graded net 7 by Noyes, net 8 by Bland). In fact all 7 are net graded for defects. The most recent discovery, the single example with just a fine crack at RTY graded VF20 net VG8 for corrosion, was uncovered by Rick DeSanctis in 10/2008 and it was sold in the McCawley & Grellman/Goldberg 9/6/2009 auction of the Daniel W. Holmes, Jr., collection as lot #286 for $20,700. Another great rarity in this superior collection. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36062.06/15000132. PCGS population attributed as 1798 NC-2: 1 in G6; 1 finer (10/24).

Ex Lincoln Village Coin & Stamp (Stockton, CA) unattributed on 11/1/1964 for $10.40-John D. "Jack" Wadlington 5/3/2005-Bob Grellman & Chris McCawley 7/27/2005-COL Steven K. Ellsworth.

John D. Wright was born in West Palm Beach, Florida, on June 6, 1939. His fascination of coins began at age 12 and, in the ninth grade, he spoke to his school Civics classes about coins. That prompted a classmate, Mabel Ann Tippin, to ask many questions. A few short years later she answered one question, and they have been married since Thanksgiving Day 1958. Wright served several decades as the treasurer of Early American Coppers beginning in 1971, a position he held until 2008. Mabel Ann served as the club's librarian from 1972 to 2008. Wright is the author of numerous articles that have appeared in *Penny-Wise* since the earliest issues in the 1960s. He is the author of *The Cent Book*, a reference on the large cents of 1816 to 1839, published in 1992, and participated in the 1996 Coinage of the Americas Conference. A graduate of Georgia Tech and a Vietnam veteran, Wright served the U.S. Air Force as a KC-135 refueling tanker pilot and is a retired systems programmer for Whirlpool Corporation. At an Indiana coin convention in 1973, Wright enrolled this cataloger (MRB) in Early American Coppers, serving to this day as a mentor and friend.

2110 **1799/8 S-188 R4, Overdate 9 over 8, XF40 PCGS**. The obverse is glossy olive brown and chocolate with reddish chocolate toning on the shoulder into the hair and puffs of darker steel brown scattered elsewhere. The reverse is glossy light olive and tan with small splashes of dark olive and reddish brown. This cent was lightly cleaned and retoned long ago, but the toning and surfaces are good enough to get a real grade from the folks at PCGS. Most of the planchet is smooth but there is microscopic roughness on the reddish area at the shoulder and similar fine roughness at the N in UNITED and IC in AMERICA. Otherwise just a few contact marks including a hairline high on the neck, a thin diagonal nick on the bust, and a tiny scratch at the top of the A in STATES. MDS, Breen state III, with die clashmarks on both sides. The date and legends are bold and the overdate feature is obvious. Graded VF35 net VF20 and tied for CC#5 in the Noyes census, his photo #27757. Bland says VF35 and tied for CC#2. This cataloger's EAC grade is VF25. Lyman Haines Low specialized in Hard Times tokens and authored pioneering research. Low numbers for this series are still used today. He was born on July 22, 1844, in Boston, and died on February 10, 1924, in New Rochelle, New York. Low was a veteran of the Civil War, serving with the 13th Massachusetts Volunteers. After the war, he worked for a time as a traveling salesman. Eventually, he moved to New York and was employed for several years as manager of Scott Stamp and Coin Company until 1896, when he went into business for himself. He issued fixed price lists and conducted approximately 200 auctions. Low is known for his discovery of the Bank of New York hoard of Fugio cents. He served several years as co-editor of the *American Journal of Numismatics* from 1891 to 1907. Adams notes: "Despite such prodigious output, Low's best performances, in our opinion, may be found in his auction catalogs. These are characterized by painstaking descriptions, exceptionally conservative grading and a wealth of background commentary."

THE FAMOUS ABBEY CENT

2111 1799 S-189 R2 XF45 PCGS, CAC Approved. Attractive glossy chocolate brown and steel with lighter steel brown toning covering the highpoints. A small spot of lighter toning in the field close over the upper end of the hair ribbon and another low on the neck can help identify this cent. The surfaces are smooth and there are only minor contact marks. The notable marks are a small tick on the top of the 7, another on the center of the adjacent 1, a nick under the N in CENT, and a couple light nicks between the T & E in STATES. E-MDS, Breen state II. The die chip below the E in ONE is just starting to form and the bottom of the date is indistinct thanks to the strike being slightly off center to the bottom (a striking characteristic of the die state and of a majority of the known examples of the variety). In fact this is the plate coin for the die state in the Breen encyclopedia. Graded VF35 net VF30 and tied for CC#2 in the Noyes census, his photo #35050. Bland says VF25 and tied for CC#6. This cataloger's EAC grade is VF25. This famous "Abbey Cent" has a provenance that is 180 years long, one of the longest unbroken ownership chains for a US Large Cent. It is the finest that CAC has approved, and according to many, the most important 1799 cent. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36140.45/13457184. PCGS population attributed as S-189: 2 in XF45; 1 finer (10/24).

Lorenzo H. Abbey was an early owner of the renowned Abbey Cent, a significant piece in numismatic history. Henry Leeds of New York sold part of the Abbey collection in September 1863, and W.E. Woodward auctioned additional items, including this 1799 cent, in October 1864. In numismatics, it is a rare distinction to be remembered for a single coin, typically reserved for extraordinary pieces like the 1804 silver dollar or the 1913 Liberty nickel. Born on January 14, 1823, in Herkimer County, New York, Abbey spent much of his life in New York City, where he was engaged in the trade of needles, fishing hooks, and tackle. His introduction to numismatics came through a friend, John Martense, a fellow numismatist, who gifted Abbey a duplicate uncirculated 1826 cent, suggesting it was worth about $5.00. Skeptical, Abbey took it to Mr. Sage, who promptly offered him $7.00. This surprising valuation ignited Abbey's passion for coin collecting, leading him to diligently search for other rare pieces. The next day, he discovered the rare "large head Nova Eboraca" cent in a grocer's till. He purchased the 1799 cent for $25.00 from Mr. Rogers, who had acquired it from a countryman for just $2.00. Other notable pieces Abbey brought to numismatic attention were the copper "Washington Half Dollars," an 1802 Half Dime (which later sold for $380.00 in Mr. Lilliendahl's auction), and other fine or rare coins.

1799/8 NC-1 CENT, VG10 OVERDATE

2112 1799/8 NC-1 R7, Overdate 9 over 8, VG10 PCGS, CAC Approved. Glossy medium brown and light chocolate. No roughness or verdigris but there are small contact marks scattered over both sides. The notable marks are a long nick on the bust, a dull nick at the dentils below the bust, several rim nicks at the top of the reverse, and fine scratches at the ribbon loops and TE in UNITED. The date and legends are complete and clear but there is some weakness at the top of the reverse, a striking characteristic of the variety because the reverse die was misaligned in that direction. This was the second example discovered (the first in 1947 by Dr. Sheldon, this one in 1958 by C. Douglas Smith) with a total of 10 known to us today, most of which are in very low grade. Graded VG8 net VG7 and CC#2 in the Noyes census of 10-7-4(2)-2(2)-1, his photo #34006. Bland says VG7 and CC#2 in a census of 12-7-5(3)-3(2)-2. This cataloger's EAC grade is VG7+, close to VG8. The most recent discovery, which is not included in the two census lists, is a PCGS graded VG8 piece (This cataloger's EAC grade VG7) discovered by Henry T. Hettger in 2020 and sold as lot 108 in the Goldberg 1/31/2021 auction where it brought $20,700. The finest example, This cataloger's EAC grade F12, Noyes grade net VG10, brought $66,125 as lot 348 in the McCawley & Grellman/Goldberg sale of the Daniel W. Holmes, Jr., collection on 9/6/2009. A nice example of another great rarity in this superior collection. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36134.10/15000134. PCGS population attributed as 1799 NC-1: 1 in VG10; 1 finer (10/24).

A charter member of Early American Coppers, Raymond Hunt Chatham, Jr. was born in Elkin, North Carolina on April 26, 1910, and died in Pinehurst, North Carolina on October 17, 1983. His World War II draft card indicates that he resided in suburban Chicago and worked for the Chatham Manufacturing Company in that city. Chatham's obituary reports that he was a retired salesman. He and his wife, Ansley, were the parents of Raymond Hunt Chatham, III and Julie (Chatham) Conroy. Chatham sold his collection to Abe Kosoff in 1958. He is credited with the discovery of the 1797 NC-6 variety in 1965. As a coin dealer, Chatham handled the collection of Dorothy Paschal. His remaining coins were marketed in 1981 through John Ashby.

2114 1800/798 S-191 R3, Overdate 800 over 798, Style I Hair, XF40 PCGS. Slightly glossy olive brown and steel on the obverse with steel brown and light chocolate on the reverse. Covered with very fine roughness and there are a few small spots of light corrosion on the reverse, mostly at the N in ONE. Otherwise just minor contact marks including two light but relatively fresh scratches in the hair left of the ear plus some tiny ticks on the neck and drapery. MDS, Breen state IV, with cracks, bulging, and swelling on the reverse. The overdate feature is clear, strongest on the 80. This cataloger's EAC grade is net VF25. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36146.40/15000086. PCGS population attributed as S-191: 4 in XF40; 4 finer (10/24).

When an anticipated need for obverse dies failed to materialize, those dies were updated with a new final digit punched over the old digit. Such varieties are known as overdates. Among the early cents, overdates are known for 1798, 1799, 1800, 1807, 1809, 1810, and 1811.

2115 **1800/79 S-192 R4, Overdate 80 over 79, Style II Hair, VF Details, Exc. Corrosion, PCGS.** The obverse is glossy brown and light chocolate; the reverse is matte dark steel with specks of bright copper thanks to a cleaning. Looks like two different coins. The obverse is covered with small contact marks plus a light scratch from the hair ribbon to the truncation over the second 0 in the date. The wreath and portions of the field are covered with fine granularity. A nicely detailed cent but the reverse is ugly. E-MDS, Breen state II, with a fine die crack arcing through IC and the fraction to the dentils at both ends. The overdate feature is obvious. This cataloger's EAC grade is net VG10. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36155.97/44279268.

Acquired from an unrecorded source 7/1983-COL Steven K. Ellsworth.

Dr. Sheldon wrote of the 1800 cents: "The cents of this year have been regarded as the hardest of all to identify, and they are among the hardest to find in fine condition." He described 27 varieties in *Penny Whimsy* including 23 numbered varieties and four non-collectible varieties. Two additional varieties are known today, and all 29 die marriages, struck from 19 obverse dies and 22 reverse dies, are included in the Ellsworth Collection. Examination of rarity ratings for each variety reveals just two varieties that are truly common with an R.1 rating. There are 22 scarce varieties that are rated R.3, R.4, or R.5, and five varieties that maintain an R.6, R.7, or R.8 variety. Following Dr. Sheldon's terminology for NC varieties, four are "now-collectible" and two remain "non-collectible," although both are offered here.

2116 1800/79 S-193 R3, Overdate 80 over 79, Style II Hair, XF Details, Repaired, PCGS. Glossy steel with dark olive green patina in the fields and protected areas. The contrast in toning accents the devices and the eye appeal of this cent is excellent in spite of the dark toning. The surfaces are smooth but there is shallow waxy verdigris in protected areas and a few minor marks. The notable marks are a dull nick on the Y, a light scratch through the first T in STATES, and a couple light scratches under the C in CENT. A recent fingerprint left a smudge in the glossy patina behind the portrait; this should be brushed away. E-MDS, Breen state II, with a fine die crack to the left from the L in LIBERTY and a stronger crack arcing through the fraction and UN. Small low spots caused by debris on the die are visible below the C and T in CENT. The overdate feature is bold. We can find no evidence of the "Repair" reported by PCGS. Graded EF45 net VF30 and tied for CC#3 in the Noyes census, his photo #28431. Bland says EF45 and CC#2. This cataloger's EAC grade is net EF40. This cent comes with an important provenance and it is the plate coin for the variety in the Breen encyclopedia. Howard Rounds Newcomb is most widely known today for his reference on the later-date large cents from 1816 to 1857, though he was a collector of the early cents and other denominations as well. Newcomb was born in Detroit on December 21, 1877, and died on January 7, 1945, in Los Angeles. He was the manager of a Detroit department store called Newcomb, Endicott & Co. He collected and wrote about several series including silver dollars, with articles about die varieties published in *The Numismatist*. His collections of half dimes and dimes were exhibited at the ANS in 1914. He also displayed, from time to time, collections of quarter eagles (117 varieties), three cent silver pieces, and proof quarters from 1796 to 1840. Newcomb was the author of *United States Copper Cents, 1816-1857* published in 1944, *The United States Cents of the Years 1801-1802-1803* published in 1925, and the co-author with George Clapp of *The United States Cents of the Years 1795-1796-1797-1800*, published in 1947.

Two famous early copper collectors, George Hubbard Clapp and Howard Rounds Newcomb, collaborated on a variety guide covering the years 1795, 1796, 1797, and 1800. Earlier references existed covering the other years from 1793 to 1814. Although the book was not published until 1947, the manuscript was completed before Newcomb's death in January 1945. In their preface, the authors wrote: "Every published variety has been carefully restudied, some removed as duplications and many new ones added. Descriptions have been corrected and elaborated, and all known varieties illustrated from the best specimens available."

In April 1960, New Netherlands Coin Company sold the "North Carolina Collection of Choice Large Cents" in their 54th auction noting that the consignor was active from about 1906 to 1940. There is a question of the collector's identity. Some sources attach the name of Frank Hussey to the collection, while other sources suggest George Hussey. Two decades earlier, J.C. Morgenthau handled the George B. Hussey collection of rare Roman coins. The timing of that March 1940 auction agrees with the later comment in the New Netherlands catalog. Additional research is pending.

A long-time Cape Cod resident, William C. Noyes was born in Brockton, Massachusetts on March 20, 1944. He is an author, photographer, coin cataloger, dealer, and collector. He began collecting coins about 1952, joined the ANA in 1955, and EAC in 1973. He served as the EAC Sale cataloger from 1980 to 1993. Noyes collects non-gold world coins from 1700 to the present and claims what may be the most complete Yeoman world coin collection in the United States. He maintains an extensive photographic library of more than 25,000 large cents and has compiled several specialty books about large cents featuring his exceptional photography.

An Altoona, Pennsylvania department store proprietor, William Francis Gable was the son of Isaac Gable and Hannah Mercer. He was born in Chester County, Pennsylvania on February 12, 1856, and died in Altoona on November 28, 1921. Gable married Kate Elizabeth Boyer in 1879, and they had five children. He opened a one room store in 1884 and expanded to a downtown building that he had constructed in the Victorian style in 1891. Reports indicate that his was the most complete department store in Pennsylvania. Gable was active in community affairs, and his active numismatic period was from 1890 to 1901. S.H. Chapman sold his collection in May 1914. He was ANA member number 281, reported in the November 1895 issue of *The Numismatist*.

The late Walter J. Husak, founder of a California firm in the aerospace industry, was one of the best known and well-liked members of the early copper community. He was born on May 27, 1942, and died on December 15, 2022. A novice collector at age 12, his numismatic pursuits were dormant for many years until he renewed his interest in 1980 with the purchase of his first large cent. From that point forward, his interest grew into a passion that elevated his name to one of the greatest in the large cent field. Husak will be remembered alongside names such as George Clapp, Howard Newcomb, Doug Smith, Homer Downing, Ted Naftzger, Dan Holmes, Robinson Brown, and others. Heritage handled the auction of his first large cent collection in 2008 and teamed with Chris McCawley's Early Cents Auctions to bring his second collection to market in 2024. Shortly after the sale of his first collection, Husak founded The Liberty Cap Foundation, a nonprofit organization that supports numismatic education.

In 2000, Bowers and Merena published *Walter Breen's Encyclopedia of Early United States Cents, 1793-1814*. The present cataloger (MRB) was editor, and Del Bland provided the condition census. While the reference has shortcomings, historical background and detailed die state notes are beneficial to today's collectors. Breen developed a new numbering system that followed his perceived emission sequence, but those numbers remain little used. Recently, Chuck Heck observed: "Breen's die state work is without question the most detailed and thorough that has ever been in print. However, he collected much of his data at a time when digital cameras and digital microscopes were not commercially available. Breen's notes and records were based upon magnifying glass observations."

The surfaces look smooth to the unaided eye but a glass shows traces of extremely faint roughness under the frosty toning. However the microscopic roughness in the central portion of the reverse is from die rust, not environmental damage, and it is always present in this die marriage. This S-210 variety used the same rusted reverse die as the preceding lot but in a later die state. No verdigris and nearly void of marks. A small nick low on the neck, a couple more close over the hair ribbon, and a nick on the leaf under the second S in STATES are the only notable marks. EDS, Breen state I. The obverse die is uncracked and unclashed, and the dull chip at the right top of the B in LIBERTY is clear. The obverse is slightly misaligned to K-6 leaving the bottom of the date tight to the edge of the planchet; the reverse is reasonably well centered on the planchet. Graded AU55 net EF45 and tied for CC#1 in the Noyes census, his photo #20656. Bland says EF45 and CC#2. This cataloger's EAC grade is AU55 sharpness net EF45. This is the plate coin for the variety in the 1991 Noyes reference and in the 2000 Breen encyclopedia. A very sharp example of a tough die variety, and it comes with a nice provenance. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36218.58/32783002. PCGS population attributed as S-210: 1 in AU58; 0 finer (10/24).

William Wallace Hays was a 19th century collector of coins, stamps, autographs, and old china. He was born on June 7, 1821, in Bellefonte, Pennsylvania and died there on July 9, 1899. Hays was employed by the Pension Office in Washington, D.C. His reference on 1794 large cents, *Varieties of United States Cents of the Year 1794*, was published in 1893. Co-authored by Ed. Frossard, it became the standard reference for many years, quickly replacing the Maris reference on 1794 cents and Frossard's 1879 Monograph on the early coppers. Hays collected 1794 cents and marked the edges of each with Maris numbers in white ink.

With a debut in May 1866, the *American Journal of Numismatics* was a scholarly numismatic magazine that remained in publication through 1924. The American Numismatic and Archaeological Society published issues from 1866 to 1870. The Boston Numismatic Society issued the magazine from 1870 to 1907, and afterward, the American Numismatic Society was the publisher through the end of the first series in 1924. The Newman Numismatic Portal describes the magazine as the "standard bearer of American numismatics" for many years. The commentary continues: "Although later issues are dominated by foreign and ancient content, the early and middle part of the run features American information found nowhere else." The American Numismatic Society began a second series of the magazine in 1989.

1800 NC-2 OVERDATE CENT VF DETAILS STYLE TWO HAIR UNIQUE DIE STATE

2137 **1800/79 NC-2 R6+, Overdate 80 over 79, Second Hair Style, VF Details, Exc. Corrosion, PCGS.** Medium brown with areas of very dark steel toning, mostly on the obverse. The planchet is covered with light to moderate corrosion with traces of reddish scale in some of the protected areas. The obverse is slightly glossy but the reverse is closer to matte. There is a rim bruise right of the Y in LIBERTY, a few scratches in the field before the portrait, a shallow pit in the field bear the rim left of the hair ribbon, and a deep nick over the N in ONE. The date is bold and the legends are strong in spite of the roughness. Struck in a unique intermediate die state with a partial cud break at the rim over the bust tip. The characteristic straight-line die crack that joins the rim from the bust tip to the rim opposite the chin is strong. This example, unlike all others known today, has a clearly defined cud break in the middle of the straight-line crack. All others known to us have either the straight-line crack or a full cud break the entire length of the crack. The discovery of this unique intermediate die state was announced in the September 1999 issue of *Penny-wise* on page 271, where it is plated. This is an ugly cent, no question there, but it is a unique die state of a rare variety. Called VF20 net G5 and tied for CC#6 in the Noyes census, his photo #59191. Not seen by Bland. This cataloger's EAC grade is net VG7. One of the finest of the 18 examples of the variety known to us, and this is (arguably) the sharpest of them all. The best of the 16 examples in the Noyes census are graded 10-8-7-6(2)-5(4)-4(3), and all but 3 of those are net graded. The Bland census for the top examples is 15-10-8-7(3)-5(4)-4. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36173.97/43878529.

Slightly glossy dark olive brown and steel, both sides recolored following the chemical removal of some small spots of raised verdigris. Fine roughness covers the planchet, strongest on the obverse, and there are a few specks of shallow reddish verdigris remaining visible on the reverse. The notable contact marks are a collection of dull nicks on the throat, a short but rather strong horizontal scratch on the bust tip, and several marks in the field before the face and neck. Looks nicer than it sounds. LDS, a die state unlisted in Breen. Only 4-four examples are known of the variety, all with a cud break at F-AMER, but this is the only one with an additional cud at UN. William Sherwood Henderson of New Bern, North Carolina joined EAC in 1994 as member number 4118. He was born on December 13, 1939, and died on January 10, 2012. He identified the second known example of this 1800 NC-5 variety. Del Bland wrote in his census that a group of 50 large cents were retained in the Arthur Rexford Willis, Sr. family, and that they came from a safe found in the woods that had been abandoned out of an old shipyard in New Bern, North Carolina. The safe was reportedly tossed out in the 1930s, was found about 1945, and remained in the Willis family until William Willis sold the large cent group to Henderson about 1996.

The founder of Early American Coppers, Herbert A. Silberman was born on December 13, 1916, in Newark, New Jersey, and passed away on February 6, 2001. He pursued his education at the Newark School of Fine and Industrial Arts, Pratt Institute, Newark University, and New York University. In 1949, he married Elaine, and together they had two children. Silberman began his career as an instructor at the Newark School of Fine and Industrial Arts from 1945 to 1946. In 1950, he founded and owned the General Art and Woodworking Company. Later, he established Associate Designers, Inc. and Associate Store Planners after 1960, where he focused on industrial design for commercial properties. A significant figure in numismatics, Silberman placed an ad in the November 9, 1966, issue of *Coin World* proposing the formation of a mail club to trade and discuss large cents. This initiative evolved into the Early American Coppers club, with Silberman serving as its first president from 1967 to 1977. He consigned parts of his numismatic collection to Harmer Rooke for auction on November 16, 1969. Silberman edited *United States Large Cents 1793-1857*, published in 1975, in collaboration with Warren Lapp. He was also a frequent contributor of articles to *Penny-Wise*.

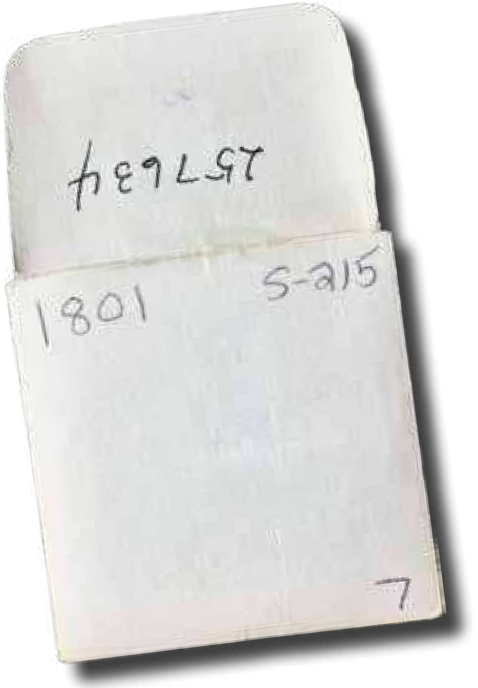
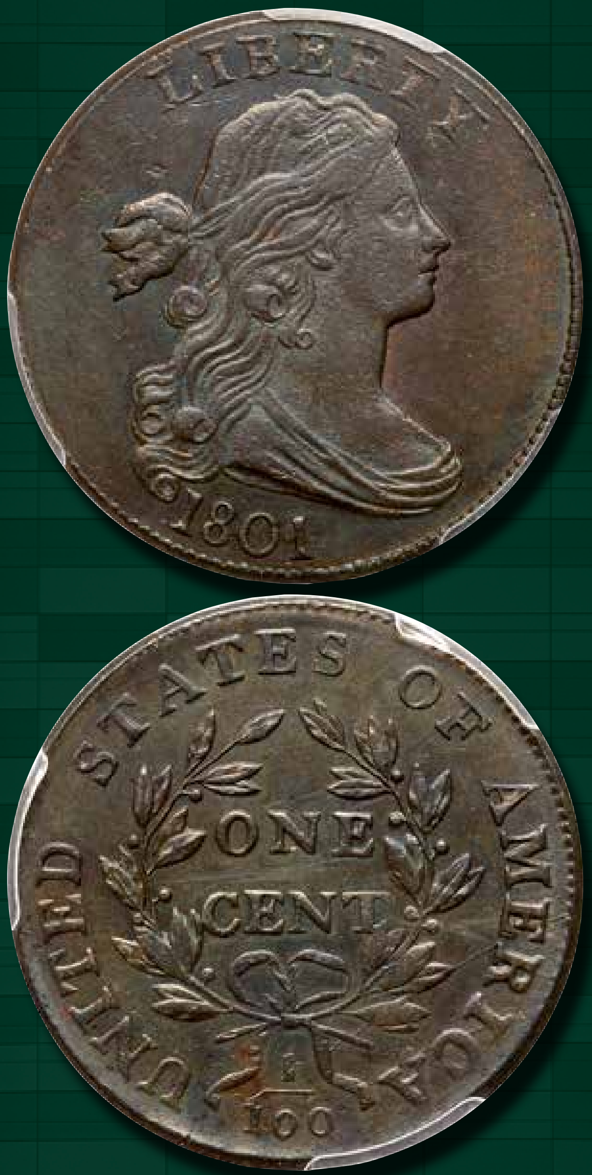
The cent coinage of 1801 utilized combinations of 11 obverse dies and 12 reverse dies to produce 17 varieties. For collectors who seek 1801 cents as a specialty, these coins present a significant challenge. There are 16 varieties that appear frequently, with ratings of R.1, 2, or 3. Five others are considered R.4, 5, or 6, and three varieties are R.7 or R.8.





1801 S-215 CENT, MS61 BROWN

2144 **1801 S-215 R4+ MS61 Brown PCGS**. Frosty olive and chocolate brown with overtones of light bluish steel. Traces of faded mint red remain visible on the obverse, particularly along the front of the neck, and this cent has excellent eye appeal. The only notable marks are a thin nick that skips across the bottom of the L in LIBERTY, a collection of tiny ticks in the field left of the hair ribbon, and a small swipe of reddish brown toning from the 1 in the denominator to the ribbon above. EDS, Breen state I, before any die cracks on the obverse. The dies were freshly lapped and the fields on both sides have a hint of prooflike reflectivity. The portrait of Miss Liberty is covered with microscopic lumps caused by fine die rust that also was present in the earlier NC-1 marriage, and the upper half of her head is softly struck as are the opposing leaves under the T in CENT. This cent has not been evaluated by Noyes or Bland. This cataloger's EAC grade is AU58, probably CC#3 for the variety based on a photo comparison but finest of the early die state ahead of the ANS example. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. (The reverse of the holder is scuffed.) #36242.61/43987719. PCGS population attributed as S-215: 1 in MS61 Brown; 0 finer (10/24).

Lightly worn on the highpoints with a few nicks including a couple left of the eye and a few more in the hair to the left. There are traces of dirt in protected areas on the reverse. E-MDS, Breen state II early, with faint die clashmarks on both sides. The bust is reasonably well struck for the variety, but it is never sharp in this die marriage. Graded EF45 net EF40 and tied for CC#23 in the Noyes census, his photo #63551. Bland says AU55 and tied for CC#11. This cataloger's EAC grade is EF45. The reddish patches contain traces of fine roughness and verdigris, and there is a less-obvious spot of light brown roughness on the second T in STATES. Traces of mint frost can be found in a few protected areas on the reverse. Just a few trivial contact marks including two tiny nicks in the hair left of the ear. EDS, Breen state I late, with just a hint of a bulge in the field off the lowest curl. This example also clearly shows the narrow rim cud below 801 and the cud over at STA. A superior example of this very rare variety in spite of the imperfections. Graded AU55 net EF40 and tied for CC#1 in the Noyes census, his photo #21891. Bland says AU50 and finest known. An active mid-20th century coin dealer, Bernard William Bluestone, known as "Barney," conducted more than 100 numismatic auctions between 1931 and 1950. His first auction of October 24, 1931, was held in Rochester, New York, giving his address in Syracuse, New York. His final auction of February 18, 1950, also gives his address in Syracuse. John W. Adams writes: "Of his personal life, almost nothing is known." There is also confusion between two individuals of the same name who lived in New York at about the same time. Both are listed in the 1930 Federal Census. Barney Bluestone of Brooklyn, New York, who was married to Rebecca, was a hardware store proprietor born in Russia in 1893. Barney Bluestone, of Syracuse, New York, who was married to Harriet (Ida), was a numismatist born in New York in 1889. Barney and Harriet Bluestone were married at an unknown date between 1917 and 1920. There is no record of children. He was ANA member 2673 as reported in the May 1924 issue of *The Numismatist*. Following membership, his first advertisement appeared in *The Numismatist* of November 1926 where he offered coins for sale. Bluestone, the son of Rabbi Aaron Bluestone, was born in New York on January 25, 1888, and died in Miami, Florida on April 25, 1956. Numismatic historian Pete Smith located a death notice for Bluestone that appeared in the *Miami Herald*, April 27, 1956. His wife and five sisters survived him.

THREE ERRORS REVERSE

2147 **1801 S-218 R5+, The Rare Three Errors Reverse Variety, VF30 PCGS**. Dark steel with lighter steel brown toning on the highpoints. Sharply detailed and nearly void of marks, but the planchet is covered with fine roughness. There are a few microscopic specks of fine verdigris on the reverse, mostly at UNIT, and the only mark is a tiny scratch on the shoulder. Sharply struck EDS, earlier than Breen state I, with no die clashmarks from dentils over ERTY. The only clashmarks are light ones through ERT with stronger ones along the profile of the face. Clearly this cent was struck prior to the S-217 variety. Graded VF35 net VF20 and tied for CC#2 in the Noyes census behind the net-graded ANS example, his photo #38989. Not seen by Bland. 2148 **1801 S-219 R2, Three Errors Reverse, MS61 Brown PCGS.** Lustrous steel brown and light olive with generous traces of mint red on the obverse. Frosty lighter brown dominates the reverse but there are small swipes of darker chocolate toning scattered over that side. Darker steel brown toning covers the highpoints on both sides and there is a small patch of crud at the rim before the eye. Looks mint state but there is a hint of rub on the highpoints. In addition there are a few marks including a faint scuff of diagonal hairlines on the cheek and jaw, a hairline hidden in the hair below the R in LIBERTY, a tiny scratch at the right bottom of the E in ONE, and a dull scratch well hidden along the left edge of the left end of the wreath ribbon. Fortunately that last scratch, which is the only significant mark, is very easy to overlook thanks to its location. MDS, Breen state V early. The crack through the T in UNITED is just starting to form. The three die-cutter errors on the reverse are strong (U over inverted U, 000 denominator, and missing left wreath stem). This cent is not perfect but it is one of the finest examples of the 3-error reverse, a very popular "Redbook" type. Graded AU55 net EF45 and tied for CC#4 in the Noyes census, his photo #28561. Bland says AU50 and tied for CC#3. This cataloger's EAC grade is net AU50. 1801 S-220 CENT, FINE DETAILS ERROR FRACTION

2149 **1801 S-220 R3, Error Fraction 1/000, Fine Details, Harshly Cleaned, PCGS**. Steel brown and chocolate. Covered with obvious parallel hairlines, and some of the hairlines are strong enough to expose the underlying coppery toning on the reverse. No roughness or additional marks. E-MDS, Breen state III, with die cracks and a rim cud at the right top of the Y but no rim break at the date. This cataloger's EAC grade is VF20 sharpness net VG10. Source not recorded-COL Steven K. Ellsworth.

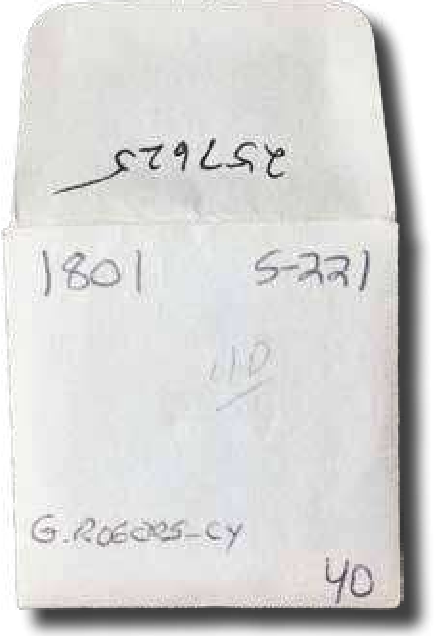
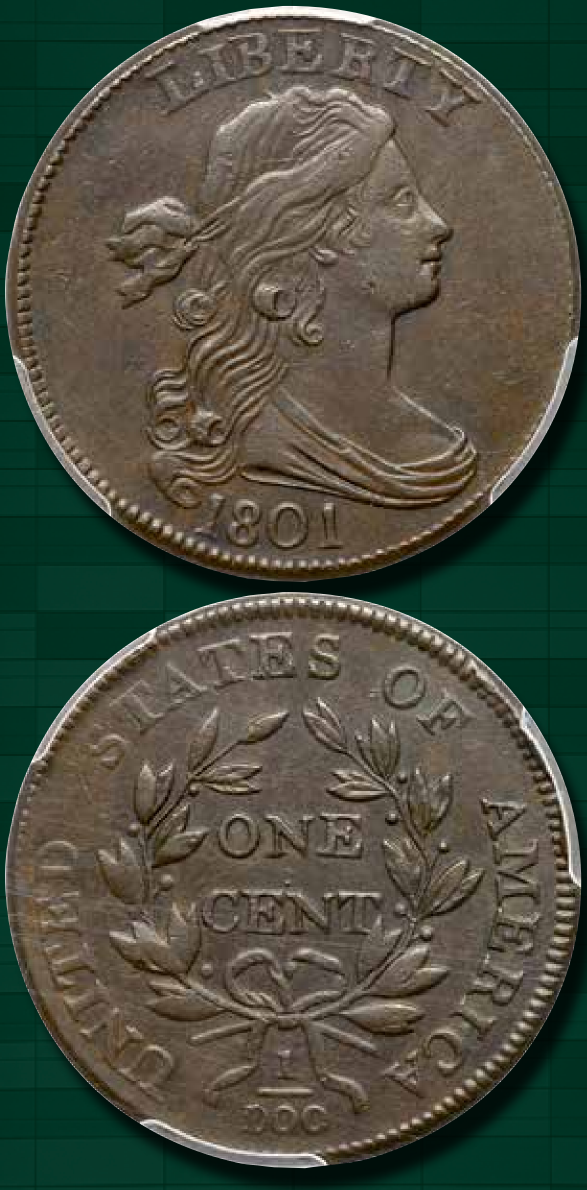
The meaningless fraction of 1/000 appears on four reverse dies that Robert Scot created for the 1801 coinage. One such die is the famous Three Errors reverse of S-218 and S-219. The others were used for S-220, NC-3, and S-223, the latter reused for 1802 S-228.





1801 S-221 CENT, AU55 CORRECTED FRACTION

2150 1801 S-221 R2, Corrected Denominator 100 over 000, AU55 PCGS, CAC Approved. Frosty medium chocolate brown. The surfaces are satiny, especially in protected areas, and this cent has excellent eye appeal. Only trivial contact marks and very light friction on the highpoints of the devices. The best identifying marks are a tiny planchet chip on the jawline midway between the throat and ear lobe, a microscopic pinprick in the center of the neck, and tiny ticks on the face. Nicely struck MDS, Breen state IV early. There is a rim break from the top of the F in OF to the adjacent A with an extension to over the center of the M (not extending to above the adjacent E). Both rim breaks are clearly defined and the Corrected Denominator feature is obvious. Graded EF40 and tied for CC#6 in the Noyes census, his photo #39589. Bland says VF35 and tied for CC#11. This cataloger's EAC grade is EF45. A nice example of this popular "Redbook" variety, and it comes with a provenance that has been traced back well over a century. The attribution, 100 over 000 feature, and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36284.55/32982295. 1801 NC-3 CENT, VG8 ERROR FRACTION DISCOVERY COIN

2156 1801 NC-3 R6+, Error Fraction 1/000, VG8 PCGS. Glossy dark olive brown and steel with lighter brown toning on the devices. The highpoints are smooth but microscopic roughness covers the fields and protected areas. Traces of fine verdigris show in some protected places. The only notable marks are a tiny, light rim bruise at the I in LIBERTY and a very light horizontal scratch at the eye. The date and legends are strong and the Error Fraction feature is bold. EDS (as are all). More than two dozen examples are known, and most of those grade less than net G4. Graded VG10 net VG8 and tied for finest known with one other example in the Noyes census, his photo #20102. The top 10 in the Noyes census are net-graded 8(2)-6(3)-5(2)-4(3). Bland says VG8 and tied for CC#1 with his top 11 grading 8(3)-7(3)-5-4(4). This is the discovery coin for the variety, the attribution made by C. Douglas Smith February 4, 1950. This cataloger's EAC grade is net VG8+. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36281.08/15000032. PCGS population attributed as 1801 NC-3: 1 in VG8; 0 finer (10/24).

C. Douglas Smith purchased this coin unattributed from Dr. Stanley Quay West in February 1950. The West name is also known for the discovery of the 1800 NC-5 overdate variety that Dr. West sold to Sheldon in November 1965. Several newspapers reported the 1952 death of Dr. Stanley Quay West, a member of the Jefferson Medical College faculty in Philadelphia. Dr. West was the father of Dr. Stanley Quay West, Jr. who was apparently the individual noted for the 1965 discovery of the 1800 NC-5. However, we are unable to identify which Dr. West sold this piece to Smith.

1801 NC-4 CENT, GOOD 4

2157 1801 NC-4 R7 Good 4 PCGS. Slightly glossy dark olive brown and steel with lighter chocolate brown on the highpoints. Fine roughness covers all but the highpoints. No verdigris but there are some marks including a dull scrape in the field off the chin (breaks the toning), a vertical nick on the lower part of the neck, and a scrape on the 80. EDS (no die states seen for the variety). The date and legends are not strong but all are easily readable. The connection between the bottoms of the B and E in LIBERTY is clear. Graded G5 net G4 and tied for CC#5 in the Noyes census, his photo #28235. The complete Noyes census is 8-7-6-5-4(4)-3(3)-2(2). Bland says G4 and tied for CC#5, and his complete census is 10-8-5(2)-4(2)-2. We know of 15 examples, nothing better than net VG8 and most net G4 or less. This cataloger's EAC grade is net G4. Comes with a nice provenance. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36263.04/15000033. American Numismatic Association Hall of Fame member John J. Pittman was born in Virginia on February 18, 1913, and died in New York on February 17, 1996. After graduating from the University of North Carolina in 1934, he was employed as a chemical engineer with Eastman Kodak until his 1971 retirement. Pittman, who married Gehring Cooper, was the father of a son and two daughters. He began collecting coins about 1923, and formed an exceptional collection that David Akers sold in three auctions in 1997 and 1998. Pittman served on the 1947 U.S. Assay Commission and served as president of several numismatic organizations including the American Numismatic Association.

Wesley Albert Rasmussen, a U.S. Navy veteran, was born on October 5, 1934, in Milwaukee, Wisconsin, and passed away on November 2, 2018, in Hudson, Wisconsin. The son of Albert and Myrtle Rasmussen, he enjoyed a variety of hobbies, including coin collecting, reading, traveling, fishing, and cheering for the Vikings. Rasmussen served as the sixth president of Early American Coppers from 1996 to 1999. He spent his career in the printing industry in Minnesota, where his company, Litho-Tech, printed *Penny-Wise* from 1986 to 2005. Litho-Tech also handled the printing for several significant numismatic works, including Bill Noyes' early-date book (1991), John Wright's middle-date reference (1992), and Bob Grellman's late-date book (1986). His late-date cent collection was sold by Superior on February 8, 1998, while Heritage Auctions managed the sale of his early and middle date cent collections in January 2005.

2159 1802 S-226 R3 AU50 PCGS. Frosty steel. A very sharp cent that has satiny luster in protected areas, but it is covered with very fine to moderate roughness, strongest at BERTY and in the field before the portrait. Obviously the roughness was not significant enough to move the PCGS graders to assign a "Details" grade. No marks or verdigris, and there is just the lightest touch of rub on the highest points of the devices. MDS, Breen state III, with a fine die crack at AMER but no crack on the obverse. Struck slightly off center to the bottom leaving much of the cud break under the 802 off the planchet. Not included in the Noyes or Bland census. This cataloger's EAC grade is AU58 sharpness net VF35. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36293.50/04326891. Six issues of the magazine were published in 1935, with four in 1936, and monthly from 1937 to 1976. NBS describes the publication as "an advertisement driven vehicle, running over three hundred pages a month at the height of the 1960s-coin boom, with the great majority of content dedicated to plying the coin trade." Several top numismatic researchers of the era contributed scholarly articles for publication.

2161 1802 S-228 R2, Error Fraction 1/000, AU50 PCGS. Frosty olive brown and steel with some lighter brown in protected areas on the reverse. Sharply detailed with no marks, but there are traces of microscopic verdigris in some of the protected areas, mostly on the reverse. A tiny spot of lighter brown toning in the hair left of the ear lobe may help identify this cent. Shallow roughness from die scaling (not corrosion) shows in the obverse fields, strongest off the lower curls. An early member of Early American Coppers, Mrs. Lillian Willins resided in Bridgton, Maine. In the September 15, 1971, issue of *Penny-Wise*, Herbert A. Silberman recounted the distinctive way in which she sold one of her pieces: she established a price and had every interested buyer write his name on a slip of paper. Julius Caesar Morgenthau (1858-1929) founded the firm bearing his name in 1905. Earlier, in 1893, he began his career as a stamp dealer in Chicago. The auction house, located in New York City, became the premier philatelic auction house in the country by the time of his death. In 1978, Morgenthau was posthumously elected to the American Philatelic Society's Hall of Fame. The firm continued to operate after Morgenthau's death, adding numismatic auctions to its philatelic repertoire. Wayte Raymond and James Macallister conducted 53 numismatic sales for J.C. Morgenthau from 1932 until 1945. The series includes the William Festus Morgan sale of June 16, 1932 and the Howard Rounds Newcomb Collection in two parts in 1945. John Adams gives an overall A rating to eight of those sales, with seven sales assigned an A rating for large cents.

A Condition Census provides details of known examples for a given variety. The basic form is a list of grades from highest to lowest for the six best examples. An expanded form gives the grade and the provenance of each top example. Beyond that, additional examples are included past the top six, and in some cases the Condition Census attempts to record the provenance of every known example.

Omaha, Nebraska octogenarian Thomas D. Reynolds is an early copper specialist whose presence is noted at coin conventions across the country. He began collecting coins in the early 1950s. After graduating from Drake University, he worked in the insurance industry. He soon discovered early copper coins and joined Early American Coppers in 1970. Continuing in the insurance business, Reynolds attended his first coin show as a dealer in 1980. He left the insurance business in 1986, in favor of full-time coin dealing, and his coin show presence continues. His personal collection included a complete set of 1798 varieties, nearly all in choice condition.

2169 **1802 S-236 R1 MS64 Brown PCGS, CAC Approved.** Lustrous tan and light brown with darker steel brown toning on the highpoints. Subtle hints of very faded mint red show in protected areas on the obverse. The only marks are puffs of darker olive brown toning on both sides, mostly on the reverse, and the spot at CA contains tiny specks of verdigris. MDS, Breen state V early, with two die cracks on the upper part of the reverse and die clashmarks on both sides. This cent has nice eye appeal but the spots are a distraction on an otherwise great cent. Called "Finest seen and possibly FK (Finest Known)" by Doug Smith. Stack's was a New York City auction company in continuous operation from 1934 to 2011, beginning under the direction of Joseph and Morton Stack. Prior to the business change into numismatic auctions, the Stack's family reportedly operated a foreign exchange house since 1858. They have handled many important large cent collections, beginning with coins from Dr. Sheldon in 1938. About the earlier history of the firm, John Adams writes: "Having been in the jewelry and antique business, brothers Morton and Joseph Stack decided to specialize in coins in 1934. The earlier roots of the business are unclear. A current rendition of history (*Coin World*, November 6, 1985) traces the Stack's lineage back to 1858 and a venture in foreign exchange launched in the Wall Street area. In contrast, some old timers in the business recall that the Stacks emigrated from the less illustrious locus of Wheeling, West Virginia." According to Adams, Stack's declined an interview at the time he was preparing his book. In addition to the long series of auctions, Stack's published *Numismatic Review* for a short period 75 years ago. This was an exceptional publication that regrettably did not continue for many more issues.

The McLean, Virginia partnership of Richard E. McLaughlin and Jack H. Robinson conducted a series of auctions under the name McLaughlin & Robinson. The firm handled a wide range of numismatic items on a wholesale and retail basis and is remembered in the copper community for several specialty copper auctions, most conducted in the 1980s and 1990s. Martin Gengerke published data on 73 events held from 1983 to 1989, offering more than 82,000 lots over that period. Douglas Bird and Gary Ruttenberg operated a west coast branch of the firm that was incorporated in March 1986 and dissolved in January 1988. Steve writes: "For several years Jack Robinson sold many of his duplicates from his collection at a small auction in Fairfax. We later became good friends as I helped him price and write his *Copper Quotes by Robinson* price guide."

Manuel and Joseph Lipson were the principals of Mayflower Coin Auctions, a Boston, Massachusetts firm that employed Maurice Gould as their chief cataloger. In *American Numismatic Auctions*, researcher Martin Gengerke identified 30 auctions that the firm conducted between 1956 and 1976. They are best remembered for handling the Emerson Gaylord gold coin collection, the C.H. Stearns collection of Massachusetts silver coins, and the Bradbury Thurlow collection.

When coinage dies are used, they undergo various changes from the high stress of striking metal on metal. Clash marks, die cracks, breaks, and chipping are frequent changes. Dies are also repaired through a process called lapping. Dies can bulge or collapse. All of these changes are termed "Die States." Chuck Heck's 2022 book, *Die States of 1794 United States Large Cents*," provides substantial information about the various changes to coinage dies.

Francis Doughty, who has sometimes been labeled a "hack writer of fiction for boys," published *The Cents of the United States, A Numismatic Study*, in 1890. The study has long been attributed to David Proskey, although information appeared in 1984 that attributes the work to the pen of Doughty. The 1890 book is essentially a reprint of articles that appeared during the 1880s in Scott & Company's *Coin Collectors' Journal*.

RARCOA is an acronym for Rare Coin Company of America, a Chicago-based numismatic firm that Ben Dreiske (1913-1978) and David Shapiro founded in 1962. Prior to that time, Dreiske was a dealer in coins and stamps since the early 1930s, doing business as Ben's Stamp and Coin Company. Shapiro was the son of gold coin collector Jacob Shapiro who used the pseudonym, Jake Bell. Ed Milas joined RARCOA in 1974, and today, his son, Wayde Milas operates the firm in Willowbrook, Illinois.

2196 1803 S-261 R2, Small Date, Large Fraction, AU55 PCGS. Glossy chocolate brown on the obverse, lighter steel brown on the reverse with several splashes of reddish brown toning scattered over that side. There are a half dozen small spots of dark toning on the head and traces of microscopic roughness show in some of the reddish brown patches on the reverse, strongest at D-S. Just a few trivial contact marks including a half dozen very tiny ticks under the chin and a few more left of the lowest curl. MDS, Breen state IV, with an arcing die crack up between the 8 & 0 through the shoulder and curls to the rim left of the ribbon. This crack is a prominent feature on the 1804 private restrikes made many decades later using this obverse die, then discarded as scrap metal, with the date altered to 1804. The obverse of this cent is plated in the Newcomb reference on the cents of 1801-1803 and in the 1991 Noyes reference to illustrate the late die state. Both sides are plated in the Breen encyclopedia to illustrate the variety. Graded AU55 net EF40 and tied for CC#7 in the Noyes census, his photo #23146. Bland says AU55 and tied for CC#2. A 'FAMOUS FOUR' VARIETY

2199 1803 S-264 R4+, Large Date, Small Fraction, VF20 PCGS. Dark olive brown and steel with lighter chocolate brown on the highpoints. The planchet is covered with uniform microscopic roughness, and a very thin layer of dark scale covers many of the protected areas. Just a few light contact marks including a couple light scrapes in the field before the neck and a couple more on the upper edge of the bust at the neck. Traces of crud can be found caked into some protected areas around the wreath. MDS, Breen state II, with die cracks on both sides. The area at STA is slightly raised but those letters remain strong. A sharply struck, nicely detailed example of this classic rarity, one of the keys to a "Redbook" set of early cents. One of the best-known numismatic authorities of the 19th century, Sylvester S. Crosby was born in Charlestown, New Hampshire, on September 2, 1831, and died in Cambridge, Massachusetts, on August 18, 1914. Crosby was the youngest of 11 children of the Reverend Avazaniah Crosby, pastor of the Charlestown Congregational Church. A watchmaker by trade, Crosby had an interest in numismatics, mushrooms, archaeology, and astronomy. He collaborated with J.N.T. Levick in an article on 1793 cent varieties (which included the famous Levick Plate), authored a later reference on 1793 cent varieties in 1897 that became the standard for many years, and is best known for his colonial reference *Early Coins of America.*

When old coinage dies were sold as scrap metal according to numismatic tradition, Joseph J. Mickley acquired those dies for his personal collection. Tradition continued to suggest that he employed those dies in various combinations to create large cent "restrikes" of 1804, 1810, and 1823. While these emissions were struck outside the Mint, they are highly collectible today. The 1823 Restrike die pair is held today in the collection of the money museum at the American Numismatic Association in Colorado Springs.

With just five die varieties for the three years, the cent coinage of 1804, 1805, and 1806 seems easily collected, although 1804 is a key date and there are three collectible die states of that S-266 die pair. Two of the three 1805 varieties are common, while the third is scarce, and 1806 is considered a common variety, although the single variety has added demand from date collectors, and for long was considered a semi-key issue.

The reverse is smoother but there are traces of dark scale in protected areas. A small pit at the bottom of the neck close to the drapery, a small nick on the end of the bust, and a couple light scratches in the field before the face are the notable marks. The scratches are blended into the toning and are very easy to miss. Nicely struck EDS, Breen state I, before any clashmarks or cracks. The "Famous Four" term originated with Denis Loring. While other Sheldon numbers are rarer, the parameters that Loring cited are: each is listed in the Red book and is easily attributed; each is rare and typically is found in low grade; each is overly expensive with respect to their actual rarity; and each is in great demand among early cent collectors.

A collector since the age of 7, Phillip W. Clover developed his interest in large cents after meeting Tom Reynolds and learning of Early American Coppers. Earlier, the U.S. Navy veteran's interests were typical of younger collectors, including Indian cents and other coins easily obtained from circulation. In 1983, he became EAC member number 1941. His large cent collecting began with a date set, then a 1797 variety set, and finally a full set of 1793 to 1814 varieties. Among the Sheldon numbers, Clover acquired all except the big three, 1793 S-15, 1794 S-37, and 1795 S-79. While his numismatic interests subsided following the sale of his collection, he continued to pursue world travel to support his conchology passion.

2222 1810 S-285 R2 MS66 Red & Brown PCGS. Lustrous light steel brown mixed with bluish olive on the left side of the obverse. Traces of mellowing mint red remain visible on both sides, particularly on the reverse. Satiny mint frost covers this cent and it has outstanding eye appeal. The best identifying marks are a microscopic planchet chip on the bust directly over the first 1 in the date, a barely visible hairline under the eye, dark crud nestled in protected places at NE in ONE and NT in CENT, and a few microscopic hairlines near the dentils under the end of the wreath stem. MDS, Breen state II. The dentils are still strong and there is a faint die crack through the bottom of the date extending through stars 13-8. This cent is plated to illustrate the variety in the 1991 Noyes reference. Graded MS63 and tied for CC#2 in the Noyes census, his photo #21661. Bland says MS65 and CC#1. The Philadelphia Mint struck Classic Head large cents with dates from 1808 to 1814. Once called the "Turban Head" cents, these coins have been known as the Classic Head cents since 1868 when Ebenezer Mason proposed the term in his Coin and Stamp Collector's Magazine. The design is attributed to the Mint's assistant engraver, Johann "John" Reich, based on an April 2, 1807, letter from Mint Director Robert Patterson to President Thomas Jefferson. Patterson wrote: "Mr. Reich is now preparing a set of new dies, in which some improvements in the devices to be introduced (adhering, however, strictly to the letter of the law), which, it is hoped, will meet with public approbation For the seven-year series, 19 die varieties are known from combinations of 19 obverse dies and 18 reverse dies. The reverse of 1811 S-286 reappeared for 1812 S-291.

1813 S-293 CENT, AU53

2230 1813 S-293 R2 AU53 PCGS. Frosty chocolate and steel brown with splashes of darker olive brown on both sides, particularly across the upper part of the neck and chin to star 4. The planchet is smooth but there is a trace of dark verdigris between stars 3 & 4, more between stars 11 & 12, and minor roughness mixed with specks of verdigris at the bottom of the reverse. The notable contact marks are a couple small nicks in the hair left of star 8, a few on the throat, and a few more in the field above the head. M-LDS, Breen state III, with strong die flowlines on both sides and the tops of TES OF A connected to a raised ridge inside the dentils. Graded AU55 net EF40 and tied for CC#17 in the Noyes census. Bland says AU50 and tied for CC#8. This cataloger's EAC grade is net EF45. This is the Breen plate coin for the variety in his 2000 encyclopedia. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. #36514.53/25649708. PCGS population attributed as S-293: 2 in AU53; 6 finer (10/24).

George Hubbard Clapp studied the large cent varieties of 1804 through 1814 and submitted his study for publication in Wayte Raymond's *Coin Collector's Journal*. His 10-page article, "The United States Cent from 1804 to 1814," included two plates that illustrated 17 die pairs and one die state. The article was reprinted in pamphlet form.

1814 S-294 CENT, MS63 BROWN CROSSLET 4

2231 1814 S-294 R1, Crosslet 4, MS63 Brown PCGS. Beautiful frosty chocolate brown and steel. Satiny mint luster covers the protected areas and this cent has great eye appeal. There is a hint of friction on the highest points but the surfaces are nearly flawless. A tiny tick on the front edge of the neck, another on the upper edge of the bust, and a thin nick under the center dot on the reverse are the only notable marks. Sharply struck EDS, Breen state I, with crisp dentils around the reverse and no die clashmarks. This cataloger's EAC grade is AU55. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. (The holder is scuffed.) #36520.63/12512119. PCGS population attributed as S-294: 7 in MS63 Brown (1 in 63+); 1 finer (10/24).

Ex Heritage Auctions (2024 FUN Convention Sale, J & J and R & R Gobrecht's Raisinet Collection) 1/4/2024:3107 ($10,800)-COL Steven K. Ellsworth.

The consignor of "J&J and R&R Gobrecht's Raisinet Collection" that Heritage sold in January 2024 writes that coin dealer Ira Stein starting him on serious coin collecting with the pursuit of completing the PCGS Set Registry collection of copper, nickel, and silver type coins. He notes that "Raisinet" in the collection name is an anagram for Ira Stein. Highlights of the 130-coin collection include a 1796 quarter graded AU58 PCGS and a 1793 S-14 large cent graded VF20 PCGS.

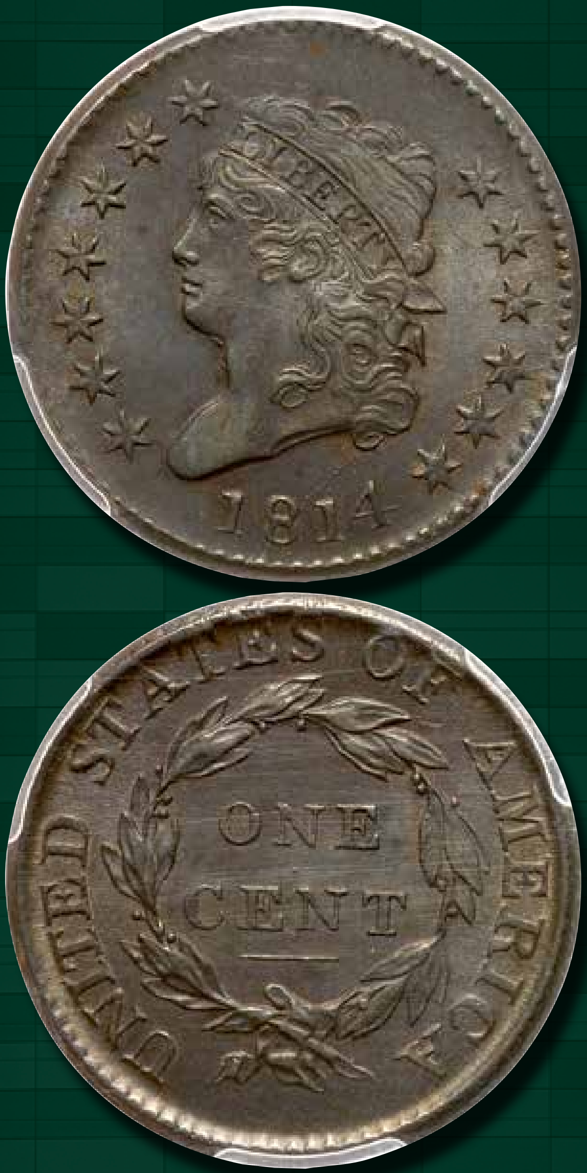
1814 S-295 CENT, MS63 BROWN PLAIN 4

2232 **1814 S-295 R1, Plain 4, MS63 Brown PCGS**. Frosty bluish steel brown. Sharp and attractive with mint state eye appeal, but there is a hint of rub on the very highest points of the devices. Only a few tiny marks including a spot of slightly darker toning between the end of the nose and star 5, another over the right edge of the 8, and a small nick off the left end of the line below CENT. M-LDS, Breen state IX, with crumbling at the neck and throat. The arcing die crack on the lower right of the obverse is clear and it reaches from rim to rim. This cataloger's EAC grade is AU58. The attribution and COL Ellsworth Collection provenance are noted on the PCGS Gold Shield label. (The holder is scuffed.) #1576.63/02538001. PCGS population attributed as S-295: 4 in MS63 Brown; 7 finer (10/24).

Ex Adam Mervis, Heritage Auctions (2014 FUN Convention Sale) 1/10/2014:2878 ($11,163)-COL Steven K. Ellsworth.

The CEO of a family-owned scrap metal processor that is one of the largest in the country, Adam Mervis enjoyed the numismatic hobby with his son, Alec, concentrating on large cents including errors and proofs. Heritage sold his large cent collection, including two Strawberry Leaf cents, all 11 1794 NC varieties, and many other rarities.



The Draped Bust cent series includes 32 varieties that are identified with NC numbers. Dr. William H. Sheldon, in *Early American Cents* and in *Penny Whimsy*, identified extremely rare varieties as "Non-Collectible" and gave them NC numbers. He considered varieties with just one or two examples outside of institutional collections to be unobtainable for most collectors. Certainly, the idea had merit, but many of those "unobtainable" varieties are now quite obtainable. Today, the 32 Draped Bust NC varieties have an average population of 17 coins each, and seven of those carry an R5 rarity rating.

If the Sheldon book was rewritten today, only 1796 NC-6, 1796 NC-7, 1797 NC-4, 1797 NC-6, 1797 NC-7, 1797 NC-8, and 1800 NC-1 would qualify as non-collectible varieties. Among the earlier cents from 1793 through 1795, nine of the 20 NC varieties are now collectible. A renumbering would reduce the total list of NC varieties to 18 and increase the Sheldon-numbered varieties from 295 to 331! The seven subvarieties, S-11b, 11c, 18b, 19b, 76b, 120b, and 121b, would remain, increasing the list of collectible early cents to 338, or 340 if the middle and late die states of 1804 are included.

While there are more than 540 known examples of Draped Bust NC varieties, few of those are in higher grades. Just 10% of that population survives in grades better than VG10, and only eight coins grade XF40 or finer, based on EAC grading standards. These coins are highly collectible condition rarities that deserve careful consideration from advanced collectors.

THANK YOU FOR YOUR BIDS

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid. The Buyer's Premium for each Auction is published by Auctioneer in the printed catalog and on the Internet. In addition to the Buyer's Premium, all successful bids placed through third-party platforms including LiveAuctioneers.com, Invaluable.com, or similar third-party platforms shall be assessed a fee of five percent (5%) of the Hammer Price ("Third-Party Platform Fee").

Bidders:

3. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
4. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
5. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

6. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid payment card information along with a social security number, well in advance of the Auction. Internet bids will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Auctioneer may, in its sole discretion, require a deposit in good funds of twenty-five percent (25%) of the amount of each bid prior to acceptance of the bid. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security so a credit check may be performed prior to Auctioneer's acceptance of a bid. Settlement via check and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction.

Bidding Options:

7. Auctioneer accepts bids from the Internet, telephone, fax, mail, floor, and HeritageLive! from registered clients.
8. Bids in Signature® Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at http://www.ha.com/c/ref/web-tips.zx#biddingTutorial.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) and floor bids must be on-increment or at a half increment ("Cut Bid"). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding or entry of bids. When identical mail or fax bids are submitted, preference is given to the first received. To ensure the greatest accuracy, written bids should be entered on the standard printed bid sheet and received by Auctioneer at least two business days prior to Auction start. Auctioneer is not responsible for executing mail bids or fax bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, fax, email, Internet, or in person once Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

Current bidding increments during any live auction session or components thereof (e.g. mail/fax bids and LiveProxy bidding) (see HA.com/c/ref/web-tips.zx#guidelines-increments) are:

Current Bid	Bid Increment	Current Bid	Bid Increment
< $10	$1	$10,000 - $19,999	$1,000
$10 - $49	$2	$20,000 - $49,999	$2,000
$50 - $99	$5	$50,000 - $99,999	$5,000
$100 - $199	$10	$100,000 - $199,999	$10,000
$200 - $499	$20	$200,000 - $499,999	$20,000
$500 - $999	$50	$500,000 - $999,999	$25,000
$1,000 - $1,999	$100	$1,000,000 - $1,999,999	$50,000
$2,000 - $4,999	$200	$2,000,000 - $9,999,999	$100,000
$5,000 - $9,999	$500	>= $10,000,000	$200,000

Note: Half-increment bidding is available prior to the live auction session.

12. If Auctioneer calls for a full increment, Bidder may request Auctioneer to accept a Cut Bid only once per lot. After offering a Cut Bid, Bidder may continue to bid on lot only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions. Bids solicited by Auctioneer at other than the expected increment will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. Any successful bid placed by a consignor on his property on the Auction floor, by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot. Auctioneer or its affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless of placed bids, Auctioneer reserves the right to withdraw any lot, or any part of a lot, from Auction at any time prior to the opening of any such lot by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live Internet bidding or the beginning of any extended period.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold or the Auctioneer may place a protective bid on behalf of the consignor.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, bidding may be extended at Auctioneer's discretion. Bidders unable to place their bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. From time to time, the Auctioneer, its affiliates, or their employees may consign items to be sold in the Auction.
22. From time to time, the Auctioneer, its affiliates, or their employees may place bids on lots in the Auction.
23. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
24. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

25. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the merchandise; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, thirty days when drawn on an international bank. Clients with pre-arranged credit may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 business days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website. Payment via card (Visa, Mastercard, and Discover) will be accepted upon prior approval by Auctioneer. All payments by card will incur a surcharge of 2.5%. Payment by eCheck, wire transfer, or check will not incur a surcharge. This fee only applies to credit transactions, and does not exceed Auctioneer's cost of processing.
26. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after Auction close. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
27. Purchased lots may be subject to taxes or fees imposed by various foreign taxing agencies. Buyer is responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to Buyer, or Buyer's representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, Buyer agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Buyer agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
28. In the event that Buyer's payment is dishonored upon presentment(s), Buyer shall pay the maximum statutory processing fee set by applicable state law. If Buyer attempts to pay via eCheck and Buyer's financial institution denies this bank account, or the payment cannot be completed using the selected funding source, Buyer agrees to complete payment using your card on file (subject to the surcharge detailed in paragraph 25).
29. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, Buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
30. In the event Buyer fails to pay any amounts due, Buyer authorizes Auctioneer to charge the Buyer's card on file with Auctioneer in the amount required to pay the invoice in full or sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Buyer agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Buyer is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
31. Title shall not pass to Buyer until all invoices are paid in full. Auctioneer shall have a lien against the merchandise purchased by Buyer to secure payment of any and all outstanding Auction invoices. Auctioneer is further granted a lien and the right to retain possession of any other property of Buyer then held by Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due Auctioneer or affiliates from Buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). Any Heritage foreclosure auction venue is deemed a reasonably commercial sale. In addition, with respect to payment of the Auction invoice(s), Buyer waives any and all rights of offset he might otherwise have against Auctioneer and the consignor of the merchandise included on the invoice. If Buyer owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Buyer, and it may secure by possessory lien any unpaid amount by any of the Buyer's property in their possession.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for all shipping, handling, registration, and renewal fees, if any. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Merchandise will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer on lots designated for

third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the card on file with Auctioneer (subject to the surcharge detailed in paragraph 25).

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot.
34. On all shipments in which Auctioneer charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Auctioneer until the common carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Buyer; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
    a. Scope of Transit Services: Merchandise for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The merchandise will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, Buyer will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
    b. Auctioneer's Compensation for Transit Services: Auctioneer will provide transit services to Buyer for ¾ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). Buyer agrees to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth herein.
    c. Auctioneer's Limitation of Liability for Transit Services: Buyer understands and agrees that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. Any claim that property has sustained loss or damage during transit must be reported to Auctioneer within seventy-two (72) hours of the delivery date. Any recovery for loss of or damage to any merchandise is limited to the lesser of actual cash value of the merchandise or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for Buyer to arrange pick-up or shipping in a timely manner (within 10 days). Merchandise will be subject to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5 daily for smaller items (storage fee per item) after 35 days. In the event the merchandise is not removed within ninety days, the merchandise may be offered for sale to recover any past due storage or moving fees, including a 25% Seller's Commission.

36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.

36. B. California State law prohibits the importation of any product containing Python skin into the State of California. No merchandise containing Python skin will be shipped to or invoiced to a person or company in California.

36. C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties, and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of merchandise or second opine contained in this Auction is for the sole purpose of identifying merchandise for those Bidders who do not have the opportunity to view merchandise prior to bidding, and no description of merchandise has been made part of the basis of the bargain or has created any express warranty that merchandise would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, e.g. Fine Art, may have express written warranties and Bidder is referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to merchandise being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the merchandise. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any merchandise by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for damage to frames, frame glass, cases, holders, or third-party grading encapsulations that do not affect the condition of the merchandise presented for auction. Such defects shall not be a basis for return, repair, or reduction in purchase price.

Release:

43. In consideration of participation in Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein, and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some merchandise sold by Auctioneer is inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Buyer accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution, Arbitration, and Remedies:

By placing a bid or otherwise participating in Auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein.

45. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to, and/or arising out of Bidder's participation in Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description, and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation, or any claim made by Bidder of a lot or Bidder's participation in Auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer {which claim Bidder consents to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent) and Auctioneer each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. In the event that any Claim needs to be litigated, including actions to compel arbitration, construe the agreement, actions in aid of arbitration, or otherwise, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. A Claim is not subject to class certification.
46. Choice of Law: Agreement and any Claim shall be determined and construed under Texas law. For auctions conducted by Heritage Auctions (HK) Limited, any Agreement and any Claim shall be determined and construed under Hong Kong law.
47. Fees and Costs: The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought versus awarded or the successful defense of a Claim based on damages sought versus awarded) may be awarded reasonable attorneys' fees and costs.
48. Remedies: Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. After one (1) year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. Exemplary or punitive damages are not permitted and are waived. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Buyer; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, refund Buyer's purchase price without further obligation. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return.
49. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

50. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
51. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
52. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in Texas. Notice is hereby given that the auctioneer is licensed by the Texas Department of Professional Licensing and Regulation, and any concerns may be addressed to Department at P. O. Box 12157, Austin, TX 78711, (512) 463-6599, or https://www.tdlr.texas.gov/.

Additional Terms & Conditions:
COINS & CURRENCY

COINS & CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS & CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage Auctions, 2801 W. Airport Freeway, Dallas TX 75261. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS & CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS & CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, http://www.ngccoin.com/ services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS & CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470; PCGS Gold Shield, PO Box 9458, Newport Beach, CA 92658. Third-party graded notes are not returnable for any reason whatsoever.

COINS & CURRENCY TERM F: Notes graded by PCGS Currency between February 4, 2009 and January 30, 2019 were graded and authenticated by K3B, Inc. under license from Collectors Universe, Inc. K3B, Inc., now operating as Legacy Currency Grading, has expressed in writing that notes graded under the license during this time period will still be covered by the full written guaranty of PCGS Currency. Warranties may be available from Collectors Universe, Inc. for all PCGS Currency notes graded prior to February 4, 2009.

COINS & CURRENCY TERM G: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS & CURRENCY TERM H: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS & CURRENCY TERM I: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS & CURRENCY TERM J: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS & CURRENCY TERM K: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS & CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS & CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS & CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS & CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms.
